ForeScout Professional Services

Network Access Control Implementation Services

At ForeScout Technologies, we pride ourselves on providing intelligent, versatile, and scalable security solutions and on having a team of high caliber consultants to deliver them. ForeScout Professional Services consultants possess expertise in a wide range of technologies with a focus on network security and network access control. The consultants must go through a rigorous training program and examination before becoming ForeScout Certified Engineers. Beyond their technical expertise, our consultants work to understand the needs of your business and design a solution to fit your processes and address your requirements for implementing Network Access Control.

ForeScout Professional Services is available to assist in your deployment, including design, installation, and configuration of Network Access Control policies.

Design
Based on your Network Access Control goals, compliance goals, and current network infrastructure, ForeScout Professional Services will recommend a NAC design:

- Appliance types, placement, and appropriate visibility of network traffic
- Integrations with network devices
  - Network Switches
  - Wireless Controllers/Access Points
  - VPN Concentrators
- Integrations with external systems
  - Mobile Device Management
  - Security Information and Event Management (SIEM) Systems
  - Endpoint patch management solutions
  - External databases
- Compliance Strategy
- Enforcement Mechanisms

Installation & Visibility
In the first stage of deployment, ForeScout Professional Services will work with your organization to perform and configure installation tasks:

- Hardware and software installation
- Integrations with network devices and systems
- Discovery and classification of network devices
- Identification of unauthorized and noncompliant devices on the network
- Inventory population
- Audit of applications installed, running services, running processes, registry keys, etc. across endpoints
- Reporting and logging

NAC Policies
Once ready for advanced control and NAC policies, ForeScout Professional Services can assist with the configuration of:

- Network authentication and restrictions
  - 802.1X
  - Dynamic access control lists
  - VLAN switching
  - Virtual Firewall
Take the ForeScout Challenge
Let us know which ForeScout solution is right for you, and we’ll arrange a free on-site evaluation.

About ForeScout
ForeScout enables organizations to continuously monitor and mitigate security exposures and cyber attacks. The company’s CounterACT appliance dynamically identifies and evaluates network users, endpoints and applications to provide visibility, intelligence and policy-based mitigation of security problems. ForeScout’s open ControlFabric architecture allows a broad range of IT security products and management systems to share information and automate remediation actions. Because ForeScout’s solutions are easy to deploy, unobtrusive, extensible and scalable, as of January 1, 2015, they have been chosen by more than 1,800 of the world’s most secure enterprises and government agencies in over 62 countries. Headquartered in Campbell, California, ForeScout offers its solutions through its global network of authorized partners. Learn more at www.forescout.com.

Guest Registration and Approvals
HTTP Captive Portal and Balloon Notifications
External device (USB) restrictions
Wireless controller/VPN restrictions
Auto remediation of software not installed, not running, or not up to date

Post-Install Health Check
A post-install health check and audit is extremely helpful in identifying any room for improvement or gaps in coverage. This will include:

- Verification of CounterACT network coverage
  - IP ranges
  - Mirrored traffic
  - Network device integrations
- Testing of enforcement and auto-remediation actions
- Identify opportunities for improved performance
- Audit policy flow and time settings

Packages and Custom Part Numbers
ForeScout Professional Services offers both custom and packaged services. Separate data sheets are available for packaged services.

Professional Services Packages
- Initial Implementation: On-site assistance with an initial implementation. See Initial Implementation data sheet for more details.
- Health Check: On-site health check services for existing deployments. See Health Check data sheet for more details.
