What's New

This version contains important fixed issues. See [Fixed Issues](#).

Installing this release also installs fixes and enhancements provided in previous releases. See [Previous Releases](#) for more information. See [How to Install](#) for installation details.

Fixed Issues

This section describes the fixed issues for this release.

Issue	Description
64555	The <i>Delete ClearPass Tag</i> action no longer deletes the specified ClearPass tag from an applicable endpoint. Now, the action sets the value of the specified ClearPass tag to null; the tag remains assigned to the applicable endpoint.
62436	When Aruba ClearPass reported endpoint disconnection events to the plugin, which it accomplishes via Syslog, the plugin mistakenly processed these events as endpoint re-authentications. Such processing by the plugin resulted in CounterACT performing unnecessary policy re-checks for the offline endpoints.
62434	The plugin incorrectly reported ClearPass-managed endpoint MAC addresses in uppercase. Doing so, resulted in CounterACT performing unnecessary policy re-checks for these endpoints.
