

November 2020

## Version Information

Forescout Device Profile Library Content Module version 20.1.11 is compatible with **Forescout 8.1, 8.2.0, and 8.2.1.**

For more information see [Module Requirements](#).

## What's New

This version contains important Device Profile Library enhancements and fixed issues. These include:

- [Fixed Issues](#)
- [New Device Profiles](#)
- [Modified Device Profiles](#)

This month's Release Notes also include a [Future Modifications](#) section, which describes modifications planned for the upcoming **December 2020** Device Profile Library release (20.1.12).

In addition, you can use the *Classification Update* feature to review, analyze, and control policy evaluation changes when upgrading the Device Profile Library Content Module. See [Upgrade Considerations and Issues](#).

Installing this release also installs enhancements and fixes provided in previous releases. See [How to Install](#) for installation details.

This release also includes an [Appendix: 20.1.9 Release - Taxonomy Changes](#).

## Fixed Issues

Issue	Description
DPL-1218	New properties are added to Device Cloud to facilitate future Device Profile Library enhancements
DPL-1221	Audit trail and additional logging support in the Device Profile Library to log activity whenever the module updates are applied by the user.
DPL-1222	At the end of each Device Profile Library module installation, your policies are parsed and checked against the content of the new version. This check can also be run from the appliance command prompt: <b>fstool profiles do_policy_scan</b> For more information refer to the Device Profile Library Configuration Guide. Update any policies containing references to classification values no longer supported by the Device Profile Library. All affected policies, their rules, and the affected values, are printed to the console pane of the Installer panel.

Issue	Description
<b>DPL-1238</b>	Primary Classification policy template is updated: <ul style="list-style-type: none"> <li>Macintosh is replaced with Apple Desktop OS</li> <li>Added support for Multiple Suggestions result for Vendor and Model</li> </ul> If <i>Primary Classification</i> policy template was previously deployed and contains the <i>Macintosh</i> sub-rule, it is recommended to re-deploy the Primary Classification policy template.

## New Device Profiles

Profiles were added for classifying the following devices.

If you are running the *Forescout Core Extensions Module: Device Classification Engine* 1.4.2 or above, some of the new Linux and Apple OS profiles could provide a more granular OS classification result than the definitions below.

Device	Function	OS	Vendor and Model
Server	Information Technology/Computer/Server	Windows/Windows Server SAC/Windows Server Version 1903	
Server	Information Technology/Computer/Server	Windows/Windows Server SAC/Windows Server Version 1909	
Server	Information Technology/Computer/Server	Windows/Windows Server SAC/Windows Server Version 1903/Windows Server Version 1903 Standard	
Server	Information Technology/Computer/Server	Windows/Windows Server SAC/Windows Server Version 1903/Windows Server Version 1903 Datacenter	
Server	Information Technology/Computer/Server	Windows/Windows Server SAC/Windows Server Version 1909/Windows Server Version 1909 Standard	
Server	Information Technology/Computer/Server	Windows/Windows Server SAC/Windows Server Version 1909/Windows Server Version 1909 Datacenter	
Printer	Information Technology/Accessory/Printer		HP/HP Printer
Printer	Information Technology/Accessory/Printer		Samsung/Samsung Printer/Samsung ML-Series Printer/Samsung ML-371x Series Printer

Device	Function	OS	Vendor and Model
Printer	Information Technology/ Accessory/Printer		Samsung/Samsung Printer/Samsung M- Series Printer
Workstation	Information Technology/ Computer/Workstation	Apple/Apple Desktop OS/Apple OS X	Apple/Apple Mac
Computer	Information Technology/ Computer	Linux/Ubuntu	
Computer	Information Technology/ Computer	Linux/RedHat	
Computer	Information Technology/ Computer	Linux/SUSE	
Computer	Information Technology/ Computer	Linux/Oracle Linux	
Computer	Information Technology/ Computer	Linux/RedHat/RedHat Enterprise	
Computer	Information Technology/ Computer	Linux/Fedora	
Computer	Information Technology/ Computer	Linux/Kali	
Computer	Information Technology/ Computer	Linux/CentOS	
Computer	Information Technology/ Computer	Linux/SUSE/SUSE Linux Enterprise	
Server	Information Technology/ Computer/Server	Linux/SUSE/SUSE Linux Enterprise for SAP	
Server	Information Technology/ Computer/Server	Linux/RedHat/RedHat Enterprise	

## Modified Device Profiles

The following Profiles have been modified to improve accuracy of Forescout eyesight Classification.

Device	Description of Change for Profile
Apple iMac Device	Taxonomy path modified from Apple/Apple iDevice to Apple/Apple Mac for better classification result
Streamer Device	Changed the priority of the device to avoid conflicts with other devices
Windows Device	Various Windows profiles were modified to support various latest Windows server versions

## Future Modifications

In the upcoming December 2020 release of the Device Profile Library (20.1.12), the following profiles will be modified for better classification results. Check if these policies are configured in your Forescout Console, and adjust if needed.

-  *Changes may vary after implementation. Review the Device Profile Library 20.1.12 Release Notes for these changes.*

Current Taxonomy	Taxonomy as of the Upcoming September 2020 Release (20.1.12)
BD/BD Pyxis Medstation 4000	BD/BD Pyxis MedStation 4000
Xerox/Xerox Printer/Xerox Printer WorkCentre 3225	Xerox/Xerox Printer/Xerox Workcentre/Xerox Workcentre 3200 Series/Xerox Workcentre 3225
Siemens/Siemens SCALANCE X212-2 FW V4.02	Siemens/Siemens PLC/Siemens SCALANCE X212-2 FW V4.02
Operational Technology/Energy & Power/Energy & Power	Operational Technology/Industrial Control Systems /Energy & Power
Operational Technology/Metal & Allied/Metal & Allied	Operational Technology/ Industrial Control Systems/Metal & Allied

Along with above taxonomy changes, various deprecated entries will be removed, and some entries will be normalized for better classification results in the Forescout console.

## Upgrade Considerations and Issues

Each profile in the Device Profile Library is a combination of properties that match a specific device type. When this version is installed, device classifications are re-evaluated using the updated Device Profile Library.

Device classification changes might influence control policies in your ForeScout environment. Use the Classification Update feature to review, analyze, and control policy evaluation changes triggered by classification profile updates.

### Previously Classified Devices

Previously classified devices might be classified differently following a Device Profile Library upgrade. Potential classification updates are detected when ForeScout eyeSight resolves the classification properties (using either an existing policy or one specially created to force a quick recheck), but the updates are only implemented if the operator applies them. A *Classification Update* message displays 8 hours after a new Device Profile Library version is installed.

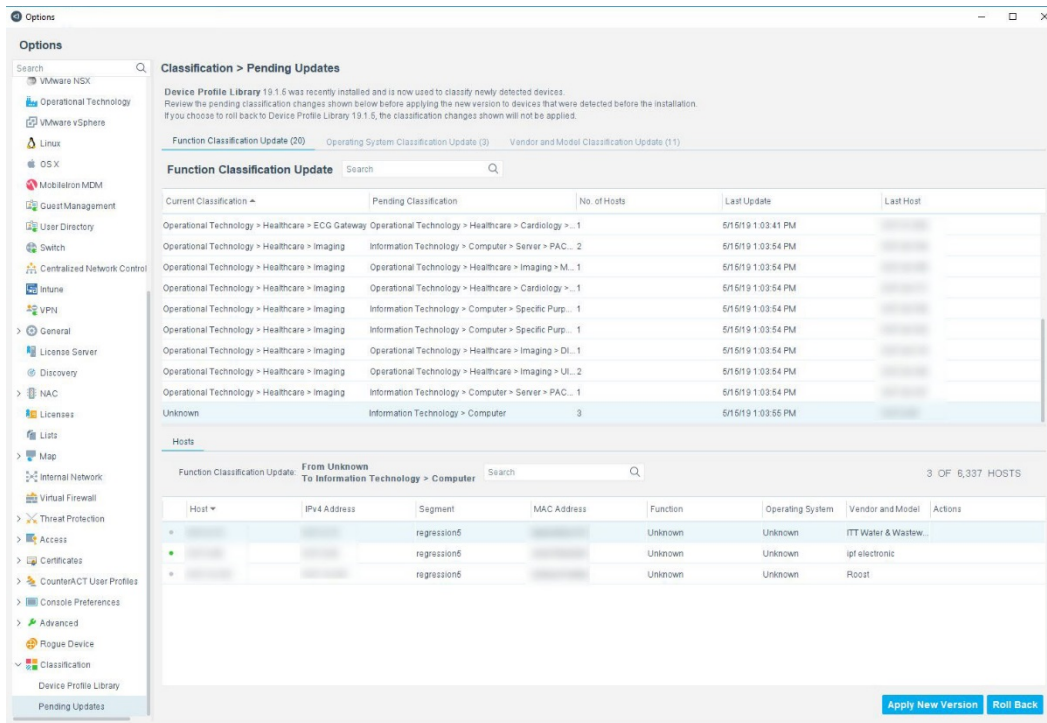

It is recommended to review the pending classification updates in order to determine if your policies are impacted by classification changes.

#### To review pending classification updates:

1. Select **Review**
2. Either
  - Review the pending classification updates
  - Or, select **Continue** to close the Classification Update message and review the pending updates another time.

To view the pending classification updates at any time, navigate to **Tools > Options > Device Profile Library**.

 *The Classification Update message will appear after subsequent Device Profile Library upgrades only if you clear the **Always apply classification updates** checkbox in **Tools > Options > Device Profile Library**. If you have policies that are impacted by classification changes, it is recommended to clear this checkbox.*

Each tab in the **Classification Update** pane displays the current and pending classifications for one of the following:

- Function
- Operating System
- Vendor and Model

Select a pending classification change to view details of the affected devices.

After reviewing the pending updates, decide if you want to:

- Immediately apply all the updates
- Modify existing policies and then apply all the updates
- Cancel the updates and roll back to a previous Device Profile Library version

## Newly Connected Devices

The classification properties of all newly connected devices are resolved using the last installed version of the library even before the update is applied.

## Classification Update Properties

You can use a policy to resolve properties that indicate pending classification updates and to handle classification update issues. The following endpoint properties are in the *Classification (Advanced)* condition node:

- Function Classification Update
- Operating System Classification Update
- Vendor and Model Classification Update

## Module Requirements

The module requires the following:

- Forescout version 8.1, 8.2.0 or 8.2.1

For optimal endpoint classification, it is recommended to install the **highest available versions** of the following Forescout components and ensure they are running:

- Core Extensions Module, including the following plugins:
  - DHCP Classifier Plugin
  - Device Classification Engine
- Windows Applications Content Module
- Endpoint Module, including the following plugins:
  - HPS Inspection Engine
  - Linux Plugin, if there are Linux endpoints in your environment
  - OS X Plugin, if there are macOS/OS X endpoints in your environment
- NIC Vendor DB Content Module
- Network Module including the Switch Plugin
- Hybrid Cloud Module, including either:
  - Amazon Web Services (AWS) Plugin
  - Microsoft Azure Plugin
- Operational Technology Module

 *If you have the Medigate Platform deployed in your environment, it is recommended to ensure that the Forescout Medigate Module is installed and running.*

## How to Install

This section describes how to install the module when a new release becomes available.

### To install the module:

1. Navigate to one of the following ForeScout download portals, depending on the licensing mode your deployment is using:

- [Product Updates Portal](#) - **Per-Appliance Licensing Mode**
- [Customer Portal, Downloads Page](#) - **Flexx Licensing Mode**

To identify your licensing mode, select **Help > About ForeScout** from the Console.

2. Download the module **.fpi** file.
3. Save the file to the machine where the Console is installed.
4. Log into the Console and select **Options** from the **Tools** menu.
5. Select **Modules**. The Modules pane opens.
6. Select **Install**. The Open dialog box opens.
7. Browse to and select the saved module **.fpi** file.
8. Select **Install**. The Installation screen opens.
9. Select **I agree to the License Agreement** to confirm that you have read and agree to the terms of the License Agreement and select **Install**. The installation cannot proceed unless you agree to the license agreement.

 *The installation begins immediately after selecting Install and cannot be interrupted or canceled.*

 *In modules that contain more than one component, the installation proceeds automatically one component at a time.*

10. When the installation completes, select **Close** to close the window. The installed module is displayed in the Modules pane.

 *Some components are not automatically started following installation.*

## Additional Forescout Documentation

For information about other Forescout features and modules, refer to the following resources:

- [Documentation Downloads](#)
- [Documentation Portal](#)
- [Forescout Help Tools](#)

### Documentation Downloads

Documentation downloads can be accessed from the [Technical Documentation Page](#), and from one of two Forescout portals, depending on which licensing mode your deployment is using.

- **Per-Appliance Licensing Mode** – [Product Updates Portal](#)
- **Flexx Licensing Mode** – [Customer Support Portal](#)

 *Software downloads are also available from these portals.*

#### To identify your licensing mode:

- From the Console, select **Help > About Forescout**.

### Technical Documentation Page

The Forescout Technical Documentation page provides a link to the searchable, web-based [Documentation Portal](#), as well as links to a wide range of Forescout technical documentation in PDF format.

#### To access the Technical Documentation page:

- Go to <https://www.Forescout.com/company/technical-documentation/>

### Product Updates Portal

The Product Updates Portal provides product and documentation downloads for Forescout platform releases, Base Modules, Content Modules, and eyeExtend Modules. The portal also provides additional documentation.

#### To access the Product Updates Portal:

- Go to <https://updates.forescout.com/support/index.php?url=counteract> and select the version you want to discover.

### Customer Support Portal

The Downloads page on the Forescout Customer Support Portal provides product and documentation downloads for Forescout platform releases, Base Modules, Content Modules, and eyeExtend Modules. Software and related documentation only appear on the Downloads page if you have a license entitlement for the software.

**To access documentation on the Customer Support Portal:**

- Go to <https://Forescout.force.com/support/> and select **Downloads**.

## Documentation Portal

The Forescout Documentation Portal is a searchable, web-based library containing information about Forescout tools, features, functionality, and integrations.

**To access the Documentation Portal:**

- Go to [https://updates.forescout.com/support/files/counteract/docs\\_portal/](https://updates.forescout.com/support/files/counteract/docs_portal/)

## Forescout Help Tools

You can access individual documents, as well as the [Documentation Portal](#), directly from the Forescout Console.

***Console Help Buttons***

- Use context sensitive *Help* buttons to quickly access information about the tasks and topics you are working with in the Console.

***Forescout Administration Guide***

- Select **Administration Guide** from the **Help** menu.

***Plugin Help Files***

- After the plugin is installed, select **Tools > Options > Modules**, select the plugin, and then select **Help**.

***Content Module, eyeSegment Module, and eyeExtend Module Help Files***

- After the component is installed, select **Tools > Options > Modules**, select the component, and then select **Help**.

***Documentation Portal***

- Select **Documentation Portal** from the **Help** menu.

## Appendix: 20.1.9 Release - Taxonomy Changes

- [Function Classification Modifications](#)
  - [Vendor & Model Classification Modifications](#)
  - [Operating System Classification Modifications](#)
- 📖 *If you are using the **Silex**, the **Hill-Rom** or the **BD** vendor values in any of your policies or actions, after you upgrade to the Device Profile Library Content Module version 20.1.9 or above, make sure to review these policies, and to update them if the value you had selected does not appear.*

### Function Classification Modifications

The following Function classification have been modified to provide more detail and improve classification.

Previous Function	Modified Function	Description
Information Technology/Computer	Information Technology/Computer	Generic Computer device
	Information Technology/Computer/Workstation	Generic Computer Workstation device
	Information Technology/Computer/Workstation/Desktop	Desktop Computer device
	Information Technology/Computer/Workstation/ Laptop	Laptop Computer device
Information Technology/Networking/Router or Switch	Information Technology/Networking/Router or Switch	Generic Router or Switch device
	Information Technology/Networking/Router or Switch/Router	Router device
	Information Technology/Networking/Router or Switch/Switch	Switch device
	Information Technology/Networking/Router or Switch/Wireless Router	Wireless Router device

## Vendor & Model Classification Modifications

The following *Vendor & Model* names have been modified for better classification results and improved granularity. You need to adjust the policies that use the following *Vendor & Model* device classifications.

## Operating System Classification Modifications

The following Operating System classifications have been modified for better classification results and improved granularity. You will need to adjust policies that use the following Operating System device classifications.

Previous Operating System Name	New Operating System Name
Alcatel-Lucent AOS-W/Alcatel-Lucent AOS-W 6.1	Alcatel-Lucent AOS-W/Alcatel-Lucent AOS-W 6/Alcatel-Lucent AOS-W 6.1
Alcatel-Lucent AOS-W/Alcatel-Lucent AOS-W 6.4	Alcatel-Lucent AOS-W/Alcatel-Lucent AOS-W 6/Alcatel-Lucent AOS-W 6.4
Arista/Arista EOS 4.11	Arista/Arista EOS 4/Arista EOS 4.11
Arista/Arista EOS 4.12	Arista/Arista EOS 4/Arista EOS 4.12
