

# ForeScout Extended Module for Tenable<sup>®</sup> VM version 2.7.1 Release Notes

---

August 2018

## Version Information

ForeScout Extended Module for Tenable Vulnerability Management (VM) 2.7.1.

This section describes requirements for this version.

## Module Requirements

- ForeScout CounterACT<sup>®</sup> version 8.0
- A module license for the Tenable VM Module. See [ForeScout Extended Module License Requirements](#) for details.

## Supported Vendor Requirements

The Tenable VM Module supports the following Tenable Network Security products:

- For communication with Nessus scanners: Nessus scanner versions 6.0.x through 6.10.x
- For communication with SecurityCenter: SecurityCenter versions 4.8.2, and 5.4.2, 5.4.5, and 5.6.1

Verify that your Tenable servers and their connected CounterACT devices regularly synchronize their clocks with the same NTP server.

## ForeScout Extended Module License Requirements

This ForeScout Extended Module requires a valid license. Licensing requirements differ based on which licensing mode your deployment is operating in:

- [Per-Appliance Licensing Mode](#)
- [Centralized Licensing Mode](#)

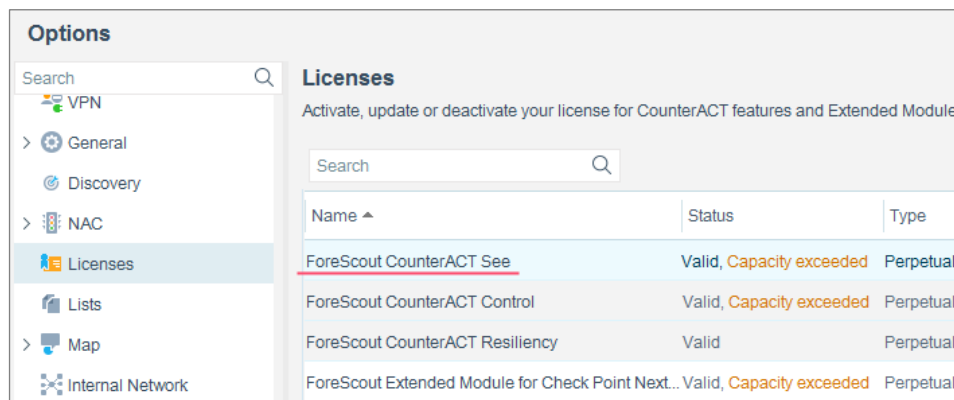

*Identifying Your Licensing Mode in the Console*

If your Enterprise Manager has a *ForeScout CounterACT See* license listed in the Console, your deployment is operating in Centralized Licensing Mode. If not, your deployment is operating in Per-Appliance Licensing Mode.

Select **Options > Licenses** to see whether you have a *ForeScout CounterACT See* license listed in the table.

# ForeScout Extended Module for Tenable<sup>®</sup> VM version 2.7.1 Release Notes

Contact your ForeScout representative if you have any questions about identifying your licensing mode.

## Per-Appliance Licensing Mode

When installing the module you are provided with a 90-day demo module license.

If you would like to continue exploring the module before purchasing a permanent license, you can request a demo license extension. Consult with your ForeScout representative before requesting the extension. You will receive email notification and alerts at the Console before the demo period expires.

When the demo period expires, you will be required to purchase a permanent module license. *In order to continue working with the module, you must purchase the license.*

Demo license extension requests and permanent license requests are made from the CounterACT Console.

*This module may have been previously packaged as a component of an Integration Module which contained additional modules. If you already installed this module as a component of an Integration Module, you can continue to use it as such. Refer to the section about module packaging in the CounterACT Administration Guide for more information.*

## Requesting a License

When requesting a demo license extension or permanent license, you are asked to provide the device *capacity* requirements. This is the number of devices that you want this license to handle. You must define at least the number of devices currently detected by CounterACT. You can request a license that handles more to ensure that you are licensed for support on additional devices as your deployment grows.

Enter this number in the **Devices** pane of the Module License Request wizard, in the CounterACT, Console Modules pane.

**To view the number of currently detected devices:**

1. Select the **Home** tab.
2. In the Views pane, select the **All Hosts** folder. The number in parentheses displayed next to the **All Hosts** folder is the number of devices currently detected.

## Centralized Licensing Mode

When you set up your CounterACT deployment, you must activate a license file containing valid licenses for each feature you want to work with in your deployment, including Extended Modules. After the initial license file has been activated, you can update the file to add additional Extended Module licenses or change endpoint capacity for existing Extended Modules. For more information on obtaining Extended Module licenses, contact your ForeScout representative.

 *No demo license is automatically installed during system installation.*

License entitlements are managed in the [ForeScout Customer Portal](#). After an entitlement has been allocated to a deployment, you can activate or update the relevant licenses for the deployment in the Console.

Each Extended Module license has an associated capacity, indicating the number of endpoints the license can handle. The capacity of each Extended Module license varies by module, but does not exceed the capacity of the See license.

# ForeScout Extended Module for Tenable<sup>®</sup> VM version 2.7.1 Release Notes

- Integration Modules, which package together groups of related licensed modules, are not supported when operating in Centralized Licensing Mode. Only Extended Modules, packaging individual licensed modules are supported. The Open Integration Module is an Extended Module even though it packages more than one module.

## More License Information

Refer to the *CounterACT Administration Guide* for information on Extended Module licenses. You can also contact your ForeScout representative or [license@forescout.com](mailto:license@forescout.com) for more information.

## About This Release

This version contains [New Features](#) and [Fixed Issues](#).

Installing this release also installs fixes and enhancements provided in previous releases. See [How to Install](#) for installation details.

## Feature Enhancements

The Tenable policy templates have been updated as follows:

A new Sub-rule was added to the **Risk Factor Results** template – *Retry if scanner is not responsive*. The new Sub-rule checks for any match of the *Repository Name* property, with a default recheck interval of one hour, and *Evaluate irresolvable criteria* as set by default to *True*.

In the **Basic Tenable Scanner Trigger** template, the default recheck interval for the *Verify scanner is reachable* Sub-rule has been changed to one hour.

## Fixed Issues

This section describes fixed issues for this release.

Issue	Description
<b>TVM-651</b>	The CounterACT service stalled 30 minutes after the Tenable plugin started.
<b>TVM-653</b>	When starting up, Tenable plugin did not synchronize information with the Secure Connector.
<b>TVM-655</b>	When performing an upgrade to CounterACT 8.0.1, the upgrade process stalled following the installation of the Tenable plugin

## How to Install

### To install the module:

1. Navigate to one of the following ForeScout download portals, depending on the licensing mode your deployment is using:

- [Product Updates Portal](#) - **Per-Appliance Licensing Mode**
- [Customer Portal, Downloads Page](#) - **Centralized Licensing Mode**

To find out which licensing mode your deployment is working with, see [Identifying Your Licensing Mode in the Console](#).

2. Download the module `.fpi` file.
3. Save the file to the machine where the CounterACT Console is installed.
4. Log into the CounterACT Console and select **Options** from the **Tools** menu.
5. Select **Modules**. The Modules pane opens.
6. Select **Install**. The Open dialog box opens.
7. Browse to and select the saved module `.fpi` file.
8. Select **Install**. The Installation screen opens.
9. Select **I agree to the License Agreement** to confirm that you have read and agree to the terms of the License Agreement, and select **Install**. The installation will not proceed if you do not agree to the license agreement.

 *The installation will begin immediately after selecting Install, and cannot be interrupted or canceled.*

 *In modules that contain more than one component, the installation proceeds automatically one component at a time.*

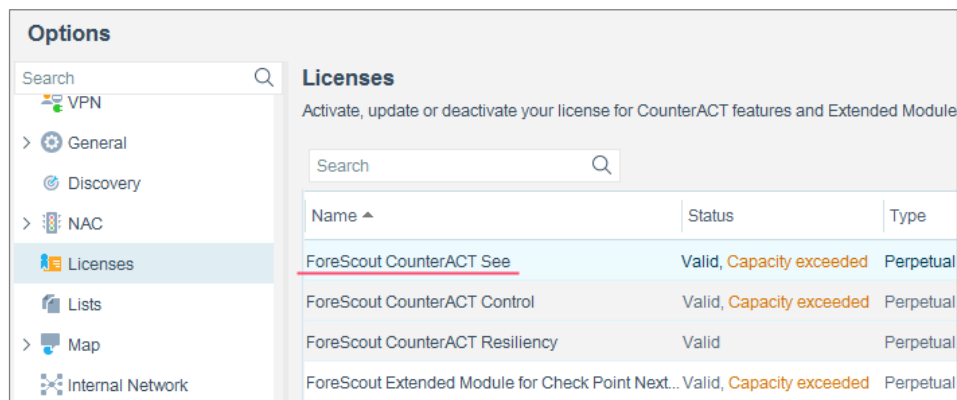

10. When the installation completes, select **Close** to close the window. The installed module is displayed in the Modules pane.

 *Some components are not automatically started following installation.*

### *Identifying Your Licensing Mode in the Console*

If your Enterprise Manager has a *ForeScout CounterACT See* license listed in the Console, your deployment is operating in Centralized Licensing Mode. If not, your deployment is operating in Per-Appliance Licensing Mode.

Select **Options > Licenses** to see whether you have a *ForeScout CounterACT See* license listed in the table.

Contact your ForeScout representative if you have any questions about identifying your licensing mode.

## More Release Information

This section provides additional release information.

### Rollback Support

Under certain circumstances you may want to roll back to a previously installed release. This may happen, for example, if your system does not operate as expected after upgrading to the new release.

#### To roll back the module:

1. Remove all policies that include the *Tenable Scan Results* property as a condition from the Policy Manager.
2. Select **Options** from the Console **Tools** menu.
3. Navigate to the **Modules** folder.
4. In the Modules pane, select the Tenable VM module.
5. Select **Rollback**. A dialog box opens listing the versions to which you can roll back.
6. Select a version and then select **OK**. A dialog box opens showing you the rollback progress.
7. Following the rollback, create new policies that include the *Tenable Scan Results* property.
