About Connect Add-On Module

The Connect Add-On Module is a companion to the Connect Plugin for customers deploying Connect with the Connect Add-On license.

Forescout eyeExtend Connect enables third party integrations with the Forescout platform. Share and receive real-time information with existing security products and automate response to mitigate security threats. Deploy a wide variety of apps with eyeExtend Connect to simplify and streamline the integration process.

The Connect Add-On Module is an optional module that can be installed, which is dependent on the installation of the Connect Plugin. It provides licensing of an additional 20 apps. Two apps are included with the Connect Plugin license.

If you need to use more than two apps, install the Connect Add-On Module and request a license. Licenses can be for either the Per-Appliance Licensing Mode (PALM) or the Flexx Licensing Mode.

For information about Forescout eyeExtend Connect Module: Connect Plugin, refer to [About Connect Plugin](#).

Customer Support

The Connect Plugin is supported by Forescout Customer Support. See <https://forescout.force.com/support/s/>.

Connect Apps, including those provided by Forescout, are not supported by Forescout.

Install Connect Add-On Module

This topic describes how to install the Connect Add-On Module. You must first install the Connect Plugin through the eyeExtend Connect Module. The Connect Add-On Module requires Connect Plugin 1.3.0 and above, which is included in eyeExtend Connect Module 1.7.0 and above.

To install the module:

1. Navigate to one of the following Forescout download portals, depending on the licensing mode your deployment is using:
 - [Product Updates Portal](#) - **Per-Appliance Licensing Mode**
 - [Customer Portal, Downloads Page](#) - **Flexx Licensing Mode**

To identify your licensing mode, select **Help > About ForeScout** from the Console.

2. Download the module `.fpi` file.
3. Save the file to the machine where the Console is installed.
4. Log into the Console and select **Options** from the **Tools** menu.
5. Select **Modules**. The Modules pane opens.
6. Select **Install**. The Open dialog box opens.

7. Browse to and select the saved module `.fpi` file.
8. Select **Install**. The Installation screen opens.
9. Select **I agree to the License Agreement** to confirm that you have read and agree to the terms of the License Agreement and select **Install**. The installation cannot proceed unless you agree to the license agreement.

 *The installation begins immediately after selecting Install and cannot be interrupted or canceled.*

 *In modules that contain more than one component, the installation proceeds automatically one component at a time.*

10. When the installation completes, select **Close** to close the window. The installed module is displayed in the Modules pane.

 *Some components are not automatically started following installation.*

Connect Plugin and Connect Add-On Module Installed

When the Connect Plugin and the Connect Add-On Module are installed, they are displayed under **Options > Modules**.

 *The Connect Add-On Module does not require any configuration nor does it have to be running.*

Request License for Connect Add-On Module

To request PALM Licensing, refer to [License Management](#) in the *Forescout Administration Guide* for details.

To request Flexx Licensing, refer to the [Forescout Flexx Licensing How-to Guide](#).
