About the eyeExtend Connect Module

The Forescout eyeExtend Connect Module provides network connectivity, visibility, and control through the following components:

- [Connect Plugin 1.3](#)
- [Data Exchange Plugin 3.9.2](#)
- [Web API Plugin 1.5.2](#)

The eyeExtend Connect Module is a Forescout eyeExtend module that consists of more than one component.

Module Requirements

Forescout version 8.1.4 or 8.2.1.

Components described in this document may have additional requirements and dependencies.

Install the Module

This module is automatically installed when you upgrade to Forescout version 8.2.x or perform a Forescout version 8.2.x clean installation. New module releases may become available between Forescout releases.

Module Component Rollback

The following rollback/upgrade activities are not supported:

- Rolling back a base module (or one of its components) to a version released prior to Forescout 8.2.x.
- Upgrading to a base module version (or one of its components) released with 8.2.x when running a version of the Forescout platform lower than 8.2.x.

If you upgrade to a newer module or component version that becomes available after this release, you may be able to roll it back. When rollback is supported, the Rollback button is enabled in the Console.

Modules/components on Appliances connected to the Enterprise Manager are rolled back to the selected version. Modules/components on Appliances that are not connected to the Enterprise Manager during the rollback are rolled back when the Enterprise Manager next reconnects to the Appliances.

To roll back the module or component:

1. Select **Options** from the Console **Tools** menu.
2. Navigate to the **Modules** folder.
3. In the Modules pane, select the module or component to be rolled back.

4. Select **Rollback**. A dialog box opens listing the versions to which you can roll back.
5. Select a version and select **OK**. A dialog box opens showing you the rollback progress.

Learn More about Module Components

This guide presents a short description of each module component. Detailed information about each component, such as requirements, features and configuration, is available in related guides.

Information about new and enhanced features as well as fixed, known and upgrade issues is available in the [Forescout Platform and Base Modules Releases Notes](#).

Refer to the relevant configuration guides for detailed information about how to work with and configure components included with this module. See [Additional Forescout Documentation](#) for information on how to access these guides, and other documentation.

Connect Plugin 1.3

The Connect Plugin provides an infrastructure for integrating third-party vendors with the Forescout platform. Use Connect to create third-party vendor integrations quickly. Use the Application Building Guide to build Connect applications.

Connect Application Building and Deployment Guide

Refer to the [Forescout Connect Application Building and Deployment Guide Version 1.3](#) for details about this eyeExtend module.

Data Exchange Plugin 3.9.2

The Data Exchange Plugin lets the Forescout platform use the following methods to communicate with external entities:

- SQL[®], Oracle[®], and LDAP servers: The Forescout platform queries (pull) and updates (push).
- Web services: The Forescout platform queries external services and receives updates via the CounterACT[®] web service hosted by Data Exchange.

Data Exchange Configuration Guide

Refer to the [Forescout Data Exchange Configuration Guide Version 3.9.2](#) for details about this eyeExtend module.

Web API Plugin 1.5.2

The Web API Plugin lets external entities communicate with the Forescout platform using simple, yet powerful web service requests based on HTTP interaction. Web API provides web service functionality.

Web API Configuration Guide

Refer to the [Forescout Web API Configuration Guide Version 1.5.2](#) for details about this eyeExtend module.

Additional Forescout Documentation

For information about other Forescout features and modules, refer to the following resources:

- [Documentation Downloads](#)
- [Documentation Portal](#)
- [Forescout Help Tools](#)

Documentation Downloads

Documentation downloads can be accessed from the [Technical Documentation Page](#), and from one of two Forescout portals, depending on which licensing mode your deployment is using.

- **Per-Appliance Licensing Mode** – [Product Updates Portal](#)
- **Flexx Licensing Mode** – [Customer Support Portal](#)

 *Software downloads are also available from these portals.*

To identify your licensing mode:

- From the Console, select **Help > About Forescout**.

Technical Documentation Page

The Forescout Technical Documentation page provides a link to the searchable, web-based [Documentation Portal](#), as well as links to a wide range of Forescout technical documentation in PDF format.

To access the Technical Documentation page:

- Go to <https://www.Forescout.com/company/technical-documentation/>

Product Updates Portal

The Product Updates Portal provides product and documentation downloads for Forescout platform releases, Base Modules, Content Modules, and eyeExtend Modules. The portal also provides additional documentation.

To access the Product Updates Portal:

- Go to <https://updates.forescout.com/support/index.php?url=counteract> and select the version you want to discover.

Customer Support Portal

The Downloads page on the Forescout Customer Support Portal provides product and documentation downloads for Forescout platform releases, Base Modules, Content Modules, and eyeExtend Modules. Software and related documentation only appear on the Downloads page if you have a license entitlement for the software.

To access documentation on the Customer Support Portal:

- Go to <https://Forescout.force.com/support/> and select **Downloads**.

Documentation Portal

The Forescout Documentation Portal is a searchable, web-based library containing information about Forescout tools, features, functionality, and integrations.

To access the Documentation Portal:

- Go to https://updates.forescout.com/support/files/counteract/docs_portal/

Forescout Help Tools

You can access individual documents, as well as the [Documentation Portal](#), directly from the Forescout Console.

Console Help Buttons

- Use context sensitive *Help* buttons to quickly access information about the tasks and topics you are working with in the Console.

Forescout Administration Guide

- Select **Administration Guide** from the **Help** menu.

Plugin Help Files

- After the plugin is installed, select **Tools > Options > Modules**, select the plugin, and then select **Help**.

Content Module, eyeSegment Module, and eyeExtend Module Help Files

- After the component is installed, select **Tools > Options > Modules**, select the component, and then select **Help**.

Documentation Portal

- Select **Documentation Portal** from the **Help** menu.
