About Network Devices Compatibility

The Forescout platform supports a wide range of device vendors and their products. The following tables describe support for hardware and software, with detailed information about the models and operating systems versions that were validated for integration with Forescout's Switch, Wireless, VPN, Cloud Network Controller, Host Property Scanner, Data Center Cloud and Extended Module Plugins.

Products in these tables below represent a subset of each vendor's product portfolio, as it is impossible to test every available model and operating system. The Forescout platform may support additional models from these vendors as well, although not explicitly specified below.

The Forescout Compatibility Team validates the suggested releases from the vendors listed. This may not always be the latest release as these releases may in fact introduce instability in the platform functionality. The team works closely with vendors to ensure stability where there is questionable platform behavior.

For more information about supported functionalities, configuration and requirements refer to individual Plugin Configuration Guides.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

Throughout this document there may be the following annotations. These are the definition of these abbreviations:

N/A - Not Applicable. The vendor does not support this feature.

N/S - Not Supported. The Forescout platform does not support this functionality. This feature may be available in a later release.

Blank - Forescout is evaluating the feature for implementation.

Wired Integrations (Switches)

The Forescout platform supports the following switches:

Cisco Switches

 VRF configuration is supported for switches that implement VRF.

Category	Switch Series	OS Version	Minimum Forescout Plugin Version	eyeSight			eyeControl		
				Endpoint Detection	VoIP Detection	Switch Discovery	Assign to VLAN	Block Switch Port	Provision ACL
Campus LAN Switches – Access	Meraki MS	MS-10.35.x MS-10.43.x MS-10.45.x	CNC-1.0.0.2017	√	√	√	N/S	N/S	N/S

About Endpoint Support Compatibility

The Forescout platform supports a wide range of endpoint vendors and their products. The following tables describe support for these vendors, with additional information about versions and flavors that were validated for integration with various Forescout components. Information is also available regarding Web Browser support, which is relevant when endpoint users interact with the Forescout web server.

For additional information about supported functionalities, configurations and requirements please refer to each of the relative Forescout Configuration Guides.

Forescout Technologies, Inc. reserves the right to change this document at any time, without notice, and at Forescout's sole discretion.

3rd Party Endpoint Module Plugins

The Forescout 3rd Party Endpoint Module provides network connectivity, visibility and control through the following component(s):

Vendor	Vendor Product	Vendor Version Supported	Minimum Forescout Product Version		
			CounterACT v7.0	CounterACT v8.0.1	CounterACT v8.1
Microsoft	SMS/SCCM	2007 2008 2012 18xx 19xx	2.2.5.3006	2.3.0.1007	2.4.1

Operating Systems

In the Forescout platform, each operating system may be supported in one of two ways:

Detailed classification (version, edition, service pack, and so on.)

Management (inspection and control using either SecureConnector™ or Remote Inspection)

Microsoft Windows (32 & 64 BIT Versions)

Management of Windows® endpoints is provided by the HPS Inspection Engine. Classification of Windows endpoints is supported by the Windows Applications Plugin. In order to manage and classify the Windows versions below, verify that you are working with both the corresponding Windows Applications and HPS Inspection Engine Plugins listed in the table.

Windows Version	Windows Flavor	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows 2000 (3)	Server Advanced Server Professional Datacenter Server	1.1.0	10.1.0
Windows XP	Home Professional Tablet PC Embedded	1.1.0	10.1.0
Windows Vista	Home Business Enterprise Ultimate	1.1.0	10.1.0
Windows 7	Starter Home Standard Professional Enterprise Ultimate	19.0.1	10.8.1.2023

Windows Version	Windows Flavor	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows 8	Standard Professional Enterprise	1.1.0	10.1.0
Windows 8.1	Standard Professional Enterprise	V8: 19.0.1 V7: 2.1.12	V8: 10.8.1.2023 V7: 10.7.3
Windows 10 – LTSB ^{15 16} v1809 (Long-Term Service Branch)	Home Professional Education Enterprise v1809	V8: 19.0.4 V7: 2.1.12	V8: 10.8.1.2023 V7: 10.7.3
Windows 10 – SAC ^{15 16} v1809 (Semi-Annual Channel)	Home Professional Education Enterprise	V8: 19.0.4 V7: 2.1.12	V8: 10.8.1.2023 V7: 10.7.3
Windows Server 2003	Standard Enterprise Datacenter Web	1.1.0	10.1.0
Windows Server 2008	Standard Enterprise Datacenter Web Server Core	V8: 19.0.1 V7: 2.1.12	V8: 10.8.1.2023 V7: 10.7.3

¹⁵ There is a known Microsoft defect that prevents the SCAP module functionality from working with this release.

¹⁶ Service Pack 4 and above installed.

Windows Version	Windows Flavor	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows Server 2012	Standard Essentials Foundation Datacenter	V8: 19.0.1 V7: 2.1.12	V8: 10.8.1.2023 V7: 10.7.3
Windows Server 2016	Standard Datacenter	V8: 19.0.4 V7: 2.1.15	V8: 10.8.1.2023 V7: 10.7.3

MAC OS X / MACOS

Management of OS X / macOS endpoints is provided using one the following inspection methods.

- Remote Inspection
- SecureConnector

Support is provided by either the OS X Plugin or the Macintosh Linux Host Property Scanner (MacLinux) Plugin.

In order to manage the OS X / Mac OS versions below, verify that you are working with the corresponding Plugins listed in the table.

OS X / macOS Version	Using Remote Inspection (Minimum Version)	Using SecureConnector (Minimum Version)
OS X 10.6.x (Snow Leopard)	MacLinux 6.1.5	N/S
OS X 10.7.x (Lion)	MacLinux 6.1.5	N/S
OS X 10.8.x (Mountain Lion)	MacLinux 6.1.5 OS X 2.0.0	MacLinux 6.1.5 OS X 1.1.0 – 2.0.0
OS X 10.9.x (Mavericks)	MacLinux 6.1.6 OS X 2.0.0	MacLinux 6.1.6 OS X 1.1.0 – 2.0.0

Linux

Management of Linux endpoints is provided using either the Remote Inspection or SecureConnector inspection method. Support was traditionally provided by the Macintosh Linux Host Property Scanner (MacLinux). As of July 2017, the Macintosh Linux Host Property Scanner is no longer being developed, and all Linux support is being transitioned to the Linux Plugin.

In order to manage the Linux versions below, verify that you are working with the corresponding Macintosh Linux Host Property Scanner, or Linux Plugin listed in the table.

Linux Flavor	Linux Version	Minimum MacLinux Plugin Version (Remote Inspection or SecureConnector)	Minimum Linux Plugin Version (Remote Inspection or SecureConnector)
CentOS	5.0	6.1.5	N/S
	6.0	6.1.5	1.1.0
	7.0		
	6.10	N/S	1.2.1.1011
7.6			

¹⁷ macOS 10.15 (Catalina) was tested on the public beta as the official release is not yet available.

Linux Flavor	Linux Version	Minimum MacLinux Plugin Version (Remote Inspection or SecureConnector)	Minimum Linux Plugin Version (Remote Inspection or SecureConnector)
Debian	8.x	7.0.0	1.1.0
	9.x	N/S	V8: 1.2.1.1011 V7: 1.1.1.1003
Fedora	18 19 20	6.1.5	1.1.0
	21 22 23	7.0.0	1.1.0
	29	N/S	V8: 1.2.1.1011 V7: 1.1.1.1003
Kali	2019.1	N/S	V8: 1.2.1.1014
	4.6.x (32 bit)	N/S	1.1.0
Mint	4.x 19.x	N/S	V8: 1.2.1.1011 V7: 1.1.1.1003
Red Hat Enterprise Linux (Workstation/Server)	5 6 7	6.1.9	1.1.0
	6.10.x 7.6.x	N/S	1.2.1.1011
OpenSUSE	12 13 42	6.1.9	1.1.0
SUSE Enterprise	11 12	6.1.9	1.1.0

Linux Flavor	Linux Version	Minimum MacLinux Plugin Version (Remote Inspection or SecureConnector)	Minimum Linux Plugin Version (Remote Inspection or SecureConnector)
Ubuntu	12.x 13.x 15.x	6.1.9	1.1.0
	14.4.x 16.4.x 18.4.x	N/S	V8: 1.2.1.1011 V7: 1.1.1.1003

Web Browsers

Web browser support is relevant when endpoint users interact with the Forescout web server. This occurs when:

- Users download SecureConnector following redirection to the captive portal.
- Using HTTP notification actions to present messages or warnings to users in their web browsers.
- Corporate or guest users sign in via a captive portal web page.
- Managing guest accounts using the Sponsor Portal.
- Using the Compliance Center to help users self-remediate.

The following web browsers are supported by the Forescout platform:

- Internet Explorer 10.x, 11.x and Microsoft Edge
- Apple Safari 9.0 and above on Mac OS; Safari 8.3 and above on iOS
- Google Chrome 46 and above
- Mozilla Firefox 43.0 and above
- Android browser 1.5 and above (*This product is EOL by vendor*)

The browser list above is non-exhaustive. Most Forescout web portals work on HTML4 compatible web browsers and are not necessarily limited to the browsers listed above. This includes old browsers that may no longer be supported by the vendors.

Note that this document/section does not deal with administrator portals such as the Assets Portal and Reports Portal. However, these portals will also work using the same web browsers listed above.

Microsoft Windows Applications

Detection of applications from the following vendors and remediation of Windows endpoints with those applications installed require Forescout's Windows Applications. When a company name is listed rather than a specific product name in the following sections, the Forescout platform supports that company's related products (for example, in the Antivirus section below, Forescout supports Microsoft's antivirus products). For detailed information about updates to Endpoint plugins, refer to the *Endpoint Module Release Notes*.

The list below is valid as of Windows Applications 2.1.2.

Antivirus

* For centrally managed AVs, the versions listed are of the agent installed on an AV-managed endpoint.

About eyeExtend Products Compatibility

The Forescout platform supports a wide range of vendors and their products. The supported versions documented in the help files describe support for eyeExtend solutions with detailed information about the models and operating systems versions that were validated for integration with Forescout's products.

Products listed in each help file represent a sub set of each vendor's product portfolio, as it is impossible to test every available model and operating system. The Forescout platform may support additional models from these vendors as well, although not explicitly specified.

For additional information about supported functionalities, configuration and requirements please refer to individual Forescout Configuration Guides.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

About Data Center/Cloud Compatibility

The Forescout platform supports a wide range of data center/cloud vendors and their products. The following tables describe support for the software versions that were validated for integration with Forescout's Plugins.

Products in these tables below represent a subset of each vendor's product portfolio, as it is impossible to test every available model and operating system. The Forescout platform may support additional models from these vendors as well, although not explicitly specified below.

For more information about supported functionalities, configuration and requirements refer to individual Plugin Configuration Guides.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

DC/Cloud

The Forescout platform supports the following software packages:

Vendor	Product		Forescout Plugin
	Name	Versions	Minimum version
VMware	VMware vSphere	6.7 Ux 6.5 Ux 6.0 Ux	V8.0.1: 2.2.0.1041 V8.1.0: 2.4.1
VMware	VMware NSX	6.2.x 6.3.x 6.4.x	V8.0.1: 1.1.0 V8.1.0: 1.2.0
AWS	Amazon Web Services (AWS)		V8.0.1: 2.0.0 V8.1.0: 2.1.0
Microsoft	Azure	3.x	V8.0.1: N/S V8.1.0: 1.0.0

About Hypervisor Compatibility

The Forescout platform supports a wide range of virtualization vendors and their products. The following tables describe support for the software versions that were validated for integration with the Forescout platform and its related subcomponents.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

Hypervisors

The Forescout platform supports the following software packages:

Product	Dependencies	
	Operating System	Minimum Supported Version
VMware ESXi	Bare Metal	6.7 Update 1 6.5 Update x 6.0 Update x
Microsoft Hyper-V	Windows Server 2016	10.x
	Windows Server 2012 R2	6.x
	Windows Server 2012	6.x
KVM	Centos v7.x	Kernel: 4.x/5.x QEMU: 1.x
	Ubuntu v18+	Kernel: 4.x QEMU: 3.x
