

Forescout Deployment Package

Forescout's Deployment Package provides an optimum mix of services to jumpstart your Forescout implementation. This combination of solution architect, professional services engineer and project manager resources will help drive product implementation, advance your visibility goals and prepare for the move to control. Our experts will help you make informed decisions when defining remediation or control policies, and planning for and staging the enterprise rollout of enforcement actions.

Forescout Professional Services will design and configure your Forescout platform with a full set of Discovery, Classification and Assessment policies, and will help you get the information and reports you need to plan for and meet your specific visibility goals, as well as prepare for the implementation of control.

The Package

Forescout's experienced Professional Services Engineers will assist with the following:

Design and Planning

- Discuss and help plan for your long-term access compliance goals and strategy
- Review network design and recommend:
 - Mirrored traffic
 - Appliance placement
 - Network and systems integrations

Implement

Platform Configuration

- Network segments and locations
- Internal Networks
- Discovery and inventory properties and timing
