

# eyelnspect

Reduce risk, automate compliance, and optimize threat analysis for OT and ICS environments

#### **Agentless**

Obtain a unified, realtime asset inventory of all connected OT and ICS devices with 30+ active and passive discovery techniques.

#### **Accurate**

Baseline assets and defend your network with thousands of OT-specific threat indicators and powerful anomaly detection.

#### **Effective**

Proactively assess risks, discover threats, measure their business impact, and quickly prioritize remediation tasks.

#### **Efficient**

Automate time-intensive compliance and risk assessment tasks while minimizing human error and increasing efficiency.

**Forescout eyeInspect** provides in-depth device visibility for OT/ICS networks and enables effective, real-time management of operational and cyber risks.

- Fully understanding the cyber-resiliency of your OT network with an Asset Risk Framework
- Gain complete device visibility through deep packet inspection of more than 300 industrial network protocols and baseline assets
- Defend your network with thousands of OT-specific threat indicators and powerful anomaly detection

#### Visualize

Get comprehensive passive device visibility without relying on SPAN for 100% coverage

Patented deep packet inspection (DPI) of 300+ IT and OT protocols

#### Detect

Collect comprehensive OT asset information and log all configuration changes for security analysis and operational forensics

Automate threat detection, containment and remediation with alert investigation and response tools

### Respond

Simplify compliance efforts for key standards, including NERC CIP, EU NIS Directive, NIST CSF, IEC 62443, and TSA Pipeline Security

Dashboards enhance user collaboration, and rich alert details support efficient incident response

### eyelnspect Solves For:

- OT visibility gaps

   caused by geo-distributed and
   heterogenous device networks.
- Defense and vulnerability challenges when patches go unaddressed, or applications are left exposed.
- Operational and cyber risk
   due to alert overload and improper remediation task prioritization.
- Incomplete threat intelligence hindering the execution of defensible policies.
- Compliance tasks
   that are resource-intensive
   and expose your organization
   to risk of serious fines.

### **Visualize**

#### Visualize thousands of devices in a single view

- Passively obtain an accurate, real-time asset inventory without disrupting operations.
- ➤ See IP-enabled and serial connected assets, including HMIs, SCADA, PLCs, building management systems (BMS) and building automation systems (BAS).
- ► Prioritize alerts and view logs according to various parameters, including time, devices, network location and alert type.

#### **Detect**

#### Detect threats and manage risks intelligently

- ► Detect known and unknown cyberthreats using thousands of ICS/ OT-specific threat checks and indicators of compromise (IOC).
- ▶ Detect cyber and operational risks and prioritize them according to the level of urgency and potential impact on the business.
- ▶ Detect noncompliant assets and policies throughout the network.
- ► Detect changes to the network in real-time, including new devices, changes to infrastructure, and irregular operational activity.

# Respond

# Respond with the world's most intelligent and scalable OT security solution

- ► Leverage intuitive risk scores to respond to cyber and operational threats which simplifies response decisions
- ► Automated workflows, rules, and remediation actions enable real-time response to threats as they emerge
- Respond to compliance changes with asset baselinedefined rules, parameters, and reports

# **Enterprise Command Center Requirements**

	PRODUCT DESCRIPTION	
Hardware/Hypervisor	19" rack server or minimum VMware ESXi 5	
Processor	4-core (Intel®) CPU 64-bit ≥ 2.4GHz	
Memory Size	16-32 GB	
Hard Drive	> 250 GB	
Network Interface	Interface for Command Center communication and web application access	

# **Command Center Requirements**

(\*) memory size for eyeSight license only

	SMALL DEPLOYMENT (up to 10)	MEDIUM DEPLOYMENT (up to 20 sensors)	LARGE DEPLOYMENT (up to 200 sensors)
Hypervisor	Minimum VMware ESXi5		
Form Factor	19" rack server or virtual appliance		
Processor	8-core CPU 64-bit	16-core (Intel) CPU 64-bit	32-core (Intel) CPU 64-bit
Memory Size	16(*)-64 GB	32(*)-128 GB	64-256 GB
Hard Drive	500 GB	1 TB	>1 TB
	(Based on data retention of 90 days)		
Network Interface	Interface for sensor communication and web application access		

# **Passive Sensor Requirements**

	SMALL DEPLOYMENT (up to 500 Mbps)	MEDIUM DEPLOYMENT (up to 800 Mbps)	LARGE DEPLOYMENT (up to 1 Gbps)
Example Hardware Model	Supermicro SME300	Forescout 4130	Forescout 5120, 5140 and 5160
Deployment Description	Deployments in small networks and harsh environments	Deployments in medium- sized networks, harsh environments	Deployments in large networks and data center installations
Form Factor	Small-sized industrial PC/DIN rail-fitting	Medium-sized industrial PC	19" 1U rack server
Processor	2- or 4-core (Intel) CPU 64-bit	6 or 8-core (Intel) CPU 64-bit with 8 GT/s	12-core or above (Intel) CPU 64-bit ≥ 2.4GHz
Memory Size	8-16 GB	16-32 GB	64-256 GB
Hard Drive	64 GB – 1TB in industrial PCs (wide-temperature SSDs should be used)		

## **Minimum Active Sensor Requirements**

# INTEGRATED WITH PASSIVE SENSOR

eyeInspect can be integrated directly on any passive sensor for small, medium and large deployments.

	STANDALONE	VIRTUAL	
Processor	2-4 core CPU	4 vCPU	
Memory Size	4 GB RAM	4 GB RAM	
Network Interface	≥1	≥1	
Hard Drive	16 GB

#### **Protocols**

For a complete list of all standard OT, IT and proprietary OT systems protocols, please visit this link: <a href="https://www.forescout.com/company/resources/eyeinspect-protocols/">https://www.forescout.com/company/resources/eyeinspect-protocols/</a>

### Discover, assess, govern

The Forescout Platform extends the value of eyelnspect with a suite of capabilities to design and implement policies and automated actions for asset management, device compliance, network access, network segmentation and incident response.

Visit <a href="https://www.forescout.com/platform/">www.forescout.com/platform/</a> to learn more.
