

Fore Scout eyeSegment Specialist Training and Certification

At Fore Scout, we believe training is a critical component of any successful solution. To that end, our training team consists of highly skilled teachers and technologists who bring a wealth of practical experience to the classroom. They are members of our Professional Services team—experts at designing and implementing the Fore Scout platform and the eyeSegment solution.

Expanding the Pathway to Success

Our Fore Scout eyeSegment Specialist (FSeSS) training expands on the foundation provided by our FSQA, FSAA and FSCE track, covering the technical skills for designing, installing and configuring Fore Scout eyeSegment. Classes can be delivered virtually or on-site when combined with our FSQA or FSAA offerings.

- **Standardized.** Our FSeSS course teaches a pre-defined set of key concepts. Lab-based exercises and demos give students a chance to experiment with the tools and solidify their knowledge of the concepts covered during classroom sessions.
- **Flexible.** We offer a variety of training options (Fore Scout-hosted, at your facility or virtual training). These options allow us to deliver a training solution that meets your budget, schedule and organizational needs.

Course Content

Fore Scout eyeSegment training is a one-day course featuring instruction and labs/demos. Students learn how to install and configure the eyeSegment solution and use all of our available tools. Students learn to configure the eyeSegment Cloud Uploader and add zones to the Traffic Matrix. They also learn how to build eyeSegment policies and view policy results via the Traffic Matrix. The FSeSS course curriculum is listed on the following page.

Highlights

- <) **Learn from Certified Professionals**
FSeSS training is taught by Fore Scout-certified instructors who have years of real-world network security experience.
- <) **Hands-On**
Learn our best practices by configuring, deploying and maintaining the Fore Scout eyeSegment solution.
- <) **Lab-Focused**
Train in a real network environment. Learn how to operate the eyeSegment solution in a lab simulation.
- <) **Become an Expert**
This course and certification enable students to become recognized eyeSegment practitioners. Students learn the best practices to architect and deploy the solution and should leave the course prepared to attain FSeSS certification.

Course Schedule

DAYS	CHAPTERS
Day One	<p>Chapter 1: Segmentation Overview The course begins by examining traditional network segmentation solutions and the security challenges they address. We also discuss the challenges to successfully implement these solutions. Next, we discuss how Forescout’s eyeSegment solution, as part of the Forescout platform, addresses these challenges.</p> <p>Chapter 2: Forescout’s eyeSegment Solution We dive into the specifics of Forescout’s eyeSegment solution and explain the Cloud Uploader plugin. Next, we discuss eyeSegment Security Zones, Groups and data sources. We then preview the Traffic Matrix and Segmentation Policies.</p> <p>Chapter 3: Initial Configuration By the end of chapter 3, you will understand how to access the portal, initially configure the Cloud Uploader and add zones to the Traffic Matrix.</p> <p>Chapter 4: Security Zones and Traffic Filters We deep-dive into eyeSight and eyeSegment groups, the eyeSegment Traffic Matrix, IP-to-IP traffic and filtering.</p> <p>Chapter 5: eyeSegment Policies In this chapter, you’ll learn how to create eyeSegment policies, how to manually and automatically create policy rules and how to configure them. We also cover rule exceptions, simulated rules and how to send notifications based on policy results. We conclude with how to view policy information in the matrix and creating Assessment/Control policies.</p> <p>Chapter 6: eyeSegment Updates In the final chapter, we cover how to filter traffic sources and the basics of role-based access control. We’ll cover matrix hardening and how to adjust the user interface. We end the course with a drill-down on the mini matrix, exporting eyeSegment traffic data and the per-cell matrix table.</p>

FSeSS Certification

Forescout recognizes the value of certifying that trained engineers have the knowledge and skills for successful eyeSegment deployment and configuration. FSeSS certification validates those skills. The FSeSS certification exam is a 45-minute, on-line exam. It requires students to demonstrate a practical knowledge of the Forescout eyeSegment solution.

Training Part Numbers

Forescout eyeSegment training offers a standardized curriculum to support the installation and configuration of the solution.

PART NUMBER	NAME
FS-TRNG-SEGMENT-1*	Single seat in 1-day Forescout eyeSegment Specialist Course. Includes 1 FSeSS certification exam.
FS-TRNG-SEGMENT-12*	1-day Forescout eyeSegment Specialist Course (virtual or on-site) – for up to 12 students. Includes up to 12 FSeSS certification exams (one per student).
FS-TRNG-CERT-FSeSS*	Forescout eyeSegment Specialist Exam.

*Notes

1. Travel is not included in any of the FS-TRNG- SKUs.
2. Services are subject to the terms and conditions set forth at <http://www.forescout.com/eula>.
3. Cancellation of any services with less than five business days' notice shall be subject to a cancellation fee plus actual expenses incurred as set forth in the above terms and conditions.
