## Forescout Hardware & Software Interoperability Matrix

Forescout has the following two series of physical hardware devices:

1. 5100 series, which supports Flexx licensing.
2. CT series, which by default supports Per-Appliance licensing, and optional migration to Flexx licensing.

Software version support differs between the two series as follows:

1. 5100 series support software versions 8.0.0 and above. The 5110 does not support version 8.2.0.
2. CT series supports software versions 7.x, and from revision 30, also versions 8.0.0 and above. The CTR does not support version 8.2.0.

 *Flexx licensing is supported with versions 8.x and above.*

The matrix below shows which software version is supported for each physical hardware model.
