Forescout Hardware & Software Interoperability Matrix

Forescout has the following two series of physical hardware devices:

1. 5100 series, which supports Flexx licensing.
2. CT series, which by default supports Per-Appliance licensing, and optional migration to Flexx licensing.

Software version support differs between the two series as follows:

1. 5100 series support software versions 8.0.0 and above. The 5110 does not support version 8.2.0 but has a Limited Appliance option for the 8.2.1 release. See the 8.2.1 Release Notes / Installation Guide for further information.
2. CT series supports software versions 7.x, and from revision 30, also versions 8.0.0 and above. The CTR does not support version 8.2.0 but has a Limited Appliance option for the 8.2.1 release. See the 8.2.1 Release Notes / Installation Guide for further information.

 Flexx licensing is supported with versions 8.x and above.

The matrix below shows which software version is supported for each physical hardware model.
