

Forescout Advanced Administrator Training and Certification

The Advanced Administrator Training: Taking It to the Next Level

At Forescout Technologies, we believe a trained customer is a critical component of a successful security solution. Our instructor-led training provides the practical skills to customize, protect and maintain the Forescout platform. Our instructors are highly trained professionals who bring a wealth of practical experience to the classroom. As members of our Professional Services team, they are skilled at training, designing and implementing the Forescout platform.

- **Deeper knowledge.** Our FSAA course expands on concepts from the Administrator course and builds your understanding of advanced integration and troubleshooting techniques. Hands-on exercises give students a chance to experiment with the tools and practice the concepts covered during classroom sessions.
- **Cost-effective.** We offer a variety of training options (Forescout-hosted, partner-hosted, at your facility or virtual training). These options ensure a training solution that meets your budget, schedule and organizational needs.

Course Content

FSAA Training is a four-day course featuring six core modules, plus six extended modules that can be tailored. Students will explore use cases, best practices and scenario-based problems. The instruction is focused on real-world situations centered on the adult learner and hands-on lab experiences in a simulated IT environment. This course will help students develop advanced skills to administer the Forescout platform, as well as practical skills needed to configure, protect and maintain the platform.

Course outline:	
1. General Review of FSCA Topics	6. Plugin Tuning - UD
2. Advanced Product Topics - Licenses, Extended Modules and Redundancy	7. Plugin Tuning - Switch
3. Advanced Product Topics - Certificates and Identity Tracking	8. Advanced Troubleshooting
4. Notifications	9. Policy Best Practices
5. Plugin Tuning - HPS	10. Policy Functionality
	11. Customized Policy Examples

Highlights

- <) **Learn Best Practices**
FSAA Training takes you deeper into Forescout platform administration. Taught by seasoned engineers with years of experience implementing and troubleshooting the Forescout Platform.
- <) **Hands-On and Lab-Focused**
Customize and troubleshoot the Forescout platform in your personal lab simulation. Gain a deeper understanding of best practices for configuring, deploying and maintaining the Forescout platform.
- <) **Flexible and Convenient**
Onsite training provides focused learning for your team's unique needs. Our instructors will travel to your location, saving you time and money while still achieving strong results.
- <) **Expand Your Knowledge**
This course expands on the theory and fundamentals of the Forescout platform, and prepares students for more advanced integrations, policies and troubleshooting.
- <) **Prerequisites**
To help ensure the best class experience, students must meet the following criteria prior to taking the class:
 - Attend FSCA Training
 - Attain FSCA Certification

Labs include:	
<ul style="list-style-type: none"> • Applying Certificates to the Forescout Platform • Deep Dive into Discover and Classify Policies • Utilizing the Device Profile Library • Interacting with User Directory 	<ul style="list-style-type: none"> • Dealing with Irresolvable Conditions • Building Advanced Policies • Discovering Installed Endpoint Applications • Capstone Project

FSAA Certification

Forescout recognizes the benefit of highly skilled advanced administrators to successfully sustain our solution’s capabilities in complex customer environments. FSAA certification validates that a person has the expertise to successfully support advanced configurations in an enterprise environment.

- **Certification Testing.** The FSAA certification test is a 120-minute online written exam. The test requires students to demonstrate an advanced knowledge of Forescout capabilities.

Training Part Numbers
