## About the HPS Agent Manager

The HPS Agent Manager performs various background functions to support the endpoint discovery and management activities of the HPS Inspection Engine.

No configuration of this plugin is required.

## About the Endpoint Module

The Forescout Endpoint Module provides connectivity, visibility, and control to network endpoints through the following Forescout components:

- Hardware Inventory Plugin
- HPS Agent Manager
- HPS Inspection Engine
- Linux Plugin
- Microsoft SMS/SCCM Plugin
- OS X Plugin

The Endpoint Module is a Forescout Base Module. Base Modules are delivered with each Forescout release. This module is automatically installed when you upgrade the Forescout version or perform a clean installation of the Forescout platform.
