About the NIC Vendor Database (DB)

The Forescout NIC Vendor Database (DB) is a Content Module that works with the HPS Inspection Engine to map Network Interface Controllers to their vendors based on their MAC address.

The NIC Vendor DB Module provides host properties that let you detect and manage endpoints based on this information.

- NIC vendor names are listed in the **NIC Vendor** host property.
- NIC vendor names can be matched using free-text search tools in the **NIC Vendor Value** host property.

Forescout Requirements

This module requires the following Forescout releases and other components:

- Forescout version 8.0.1 or above
- Endpoint Module version 1.0 or above, including the following components:
 - HPS Inspection Engine
 - Linux Plugin
 - OS X Plugin

NIC Vendors Detected by CounterACT

The HPS NIC Vendor Database identifies NIC vendors by their MAC Address Block as defined by the IEEE Standards Association. This block of the MAC address was

previously known as the OUI (Organizationally Unique Identifier). The NIC Vendor DB uses the following MAC Address Block repositories:

- MA-L (MAC Address Block Large)
- MA-M (MAC Address Block Medium)
- MA-S (MAC Address Block Small)
- IAB (Individual Address Block)

Each release of this module updates vendor information to reflect changes to these repositories maintained by the IEEE.

 *The IEEE no longer updates the IAB repository. The module uses the last IAB dataset.*

Installation

To install the module:

1. Navigate to one of the following ForeScout download portals, depending on the licensing mode your deployment is using:
 - [Product Updates Portal](#) - **Per-Appliance Licensing Mode**
 - [Customer Portal, Downloads Page](#) - **Flexx Licensing Mode**

To identify your licensing mode, select **Help > About ForeScout CounterACT...** from the Console.

2. Download the module `.fpi` file.
3. Save the file to the machine where the CounterACT Console is installed.
4. Log into the CounterACT Console and select **Options** from the **Tools** menu.
5. Select **Modules**. The Modules pane opens.
6. Select **Install**. The Open dialog box opens.
7. Browse to and select the saved module `.fpi` file.
8. Select **Install**. The Installation screen opens.
9. Select **I agree to the License Agreement** to confirm that you have read and agree to the terms of the License Agreement and select **Install**. The installation does not proceed if you do not agree to the license agreement.

 *The installation will begin immediately after selecting Install and cannot be interrupted or canceled.*

 *In modules that contain more than one component, the installation proceeds automatically one component at a time.*

10. When the installation completes, select **Close** to close the window. The installed module is displayed in the Modules pane.

 *Some components are not automatically started following installation.*

Verify That the Module Is Running

After installing the module, verify that it is running.

To verify:

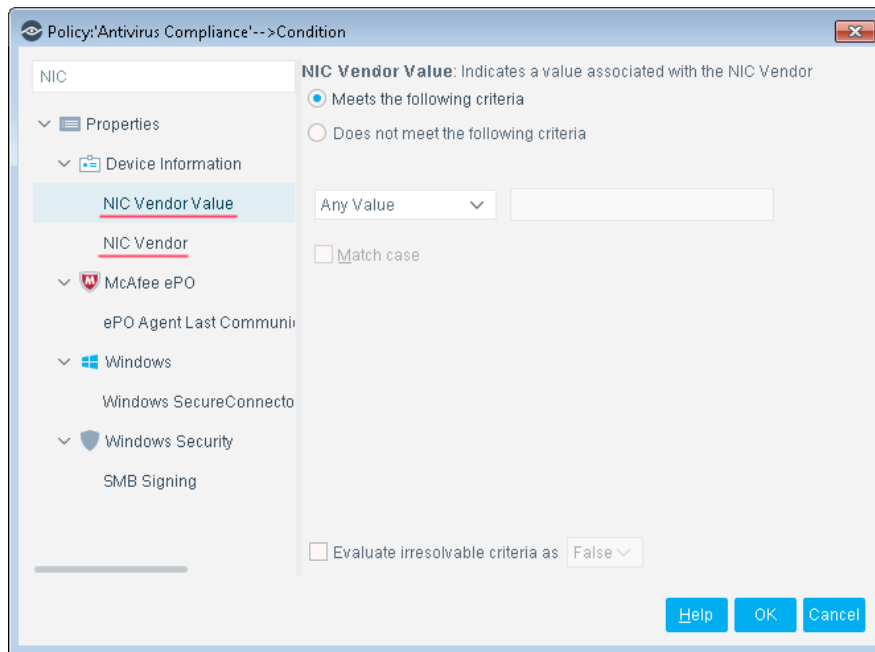

1. Select **Tools>Options** and then select **Modules**.
2. Navigate to the module and select **Start** if the module is not running.

Configuration

No module configuration is required.

Detecting Endpoints by NIC Vendor

The module provides the following host properties that can be used to build policy conditions based on the NIC controllers installed on endpoints.

<p>NIC Vendor</p>	<p>Indicates the vendor of the NIC, based on its MAC Address Block value.</p> <p>To define a matching condition, select Add and then select one or more MAC Address Block values in the NIC Vendor dialog.</p> <p>To detect endpoints with locally administered MAC addresses, select the Locally Administered MAC Address option in the NIC Vendor dialog. This option matches MAC addresses whose Universal/Local bit is set to 1 (local).</p>
--------------------------	--

NIC Vendor Value	Indicates NIC Vendor values in text format. Use text matching tools to create conditions that match several variants of a vendor name or look for a specific substring in a name.
-------------------------	---

Additional CounterACT Documentation

For information about other CounterACT features and modules, refer to the following resources:

- [Documentation Downloads](#)
- [Documentation Portal](#)
- [CounterACT Help Tools](#)

Documentation Downloads

Documentation downloads can be accessed from one of two ForeScout portals, depending on which licensing mode your deployment is using.

- **Per-Appliance Licensing Mode** – [Product Updates Portal](#)
- **Flexx Licensing Mode** – [Customer Portal](#)

 *Software downloads are also available from these portals.*

To identify your licensing mode:

- From the Console, select **Help > About ForeScout CounterACT....**

Product Updates Portal

The Product Updates Portal provides links to CounterACT version releases, Base and Content Modules, and Extended Modules, as well as related documentation. The portal also provides a variety of additional documentation.

To access the Product Updates Portal:

1. Go to <https://updates.forescout.com/support/index.php?url=counteract>.
2. Select the CounterACT version you want to discover.

Customer Portal

The Downloads page on the ForeScout Customer Portal provides links to purchased CounterACT version releases, Base and Content Modules, and Extended Modules, as well as related documentation. Software and related documentation only appear on the Downloads page if you have a license entitlement for the software. The Documentation page on the portal provides a variety of additional documentation.

To access documentation on the ForeScout Customer Portal:

1. Go to <https://forescout.force.com/support/>.
2. Select **Downloads** or **Documentation**.

Documentation Portal

The ForeScout Documentation Portal is a searchable, web-based library containing information about CounterACT tools, features, functionality, and integrations.

 *If your deployment is using Flexx Licensing Mode, you may not have credentials to access this portal.*

To access the Documentation Portal:

1. Go to https://updates.forescout.com/support/files/counteract/docs_portal/.
2. Use your customer support credentials to log in.
3. Select the CounterACT version you want to discover.

CounterACT Help Tools

Access information directly from the CounterACT Console.

Console Help Buttons

Use context-sensitive *Help* buttons to access information about tasks and topics quickly.

CounterACT Administration Guide

Select **CounterACT Help** from the **Help** menu.

Plugin Help Files

1. After installing the plugin, select **Options** from the **Tools** menu and then select **Modules**.
2. Select the plugin and then select **Help**.

Documentation Portal

Select **Documentation Portal** from the **Help** menu.
