About the Web Client Plugin

The Web Client Plugin is a component of the Forescout Core Extensions Module. See [Core Extensions Module Information](#) for details about the module.

The Web Client Plugin delivers the Forescout Web Client, which hosts the following web-based tools:

- Dashboards view
- Assets view
- Segmentation view (eyeSegment application)

Although the Forescout Web Client hosts these tools, actual functionality provided by the tools is delivered via separate Forescout components.

For information about how to work with the Dashboards and Assets views, refer to the *Forescout Administration Guide*.

For information about how to work with the Segmentation view, refer to the *eyeSegment Module Configuration Guide* and the *eyeSegment Application How-to Guide*.

See [Additional Forescout Documentation](#) for information on how to access these guides.
