

Staff Augmentation Package (Professional Services Consulting)

ForeScout's **Staff Augmentation Package** includes Professional Services engineering resources to assist with the evolution and expansion of your ForeScout implementation. ForeScout Engineers identify the current state of your network and advise on or implement best practices to enable you to make informed decisions when enhancing device visibility and control policies and/or planning for an enterprise rollout of enforcement/remediation actions.

After baselining the current state of your deployment, ForeScout Professional Services will update ForeScout platform Discovery, Classification and Assessment policies and will help you get the information and reports you need to plan for and meet your specific goals.

The Package

ForeScout's highly experienced Professional Services Engineers will deliver onsite or remote consulting services to assist with the following types of activities:

Design and Planning

- Discuss the current state of your ForeScout environment and next steps to help achieve your long-term goals and compliance strategy
- Review network design and recommend:
 - Appliance placement
 - Mirrored traffic
 - Network and systems integrations

Platform Configuration

- Enhance appliance performance
 - Update with the latest software
 - Activate additional capabilities (threat protection, syslog messages, reports)
- Maximize network integrations
- Expand and optimize endpoint management

Platform Policies

- Optimize current policies
- Expand policies to cover more of your environment
- Update policies to add new use cases
 - New compliance standards
 - Guest management
 - Control actions
 - Orchestration requirements
