**ForeScout Sponsors (ISC)² Webcast:
'Challenges and Benefits of Continuous Monitoring and BYOD'**

CUPERTINO, Calif. — September 10, 2013 — Increasing visibility into your network traffic, devices, systems, applications and users is key to increasing security, resilience and knowledge of what's happening in your infrastructure. The webinar, "Challenges and Benefits of Continuous Monitoring and BYOD," with (ISC)², sponsored by ForeScout and Gigamon, will examine key requirements and technologies for gaining complete [visibility](#).

The speakers will examine key requirements and technologies for IT to gain enterprise visibility, control and automation. Common network visibility, access and endpoint compliance gaps, along with approaches to leveraging infrastructure and security investments that effectuate IT-GRC security controls will also be discussed. The expert panel includes [Spencer Wilcox](#), CISSP, Excelon; [JJ Thompson](#), CISSP, Rook Consulting; and [Bob Reny](#), CISSP, System Engineer, ForeScout.

The webcast, "The Challenges and Benefits of Continuous Monitoring and [BYOD](#)," will be held on Sept. 12, at 1 p.m. EDT. Register for the webcast at <https://www.brighttalk.com/webcast/5385/83645>.

ForeScout helps organizations gain complete visibility and automated control for all devices, users, systems and applications attempting to connect to an enterprise network – wired or wireless, managed or unmanaged, PC or mobile. ForeScout [CounterACT](#)TM identifies enterprise security control gaps, such as rogue devices, non-compliant systems or personal mobile device use, and offers options to isolate threats and dynamically fix issues with little or no IT intervention. The solution integrates with a company's existing network, security, identity, wireless and mobile infrastructure, and it scales to serve large enterprise and medium businesses.
