ForeScout Hosts Free Best Practices Seminars

Series features hands-on tutorials, customer presentations and an overview of the latest trends in network security

CAMPBELL, Calif. — October 31, 2013 — **ForeScout Technologies, Inc.**, a leading provider of pervasive network security solutions for Fortune 1000 enterprises and government organizations, today announced the upcoming fall roster of Best Practices Seminars. The free, content-rich seminars are designed to offer customers and partners an opportunity to learn how to gain the best possible value from their **CounterACT™** deployments through discussion, hands-on training, peer feedback and Q-and-A sessions.

These two-day seminars are each divided into two tracks:

- **Management Sessions:** These sessions focus on how users can drive the most value from their CounterACT deployment by taking the processes to the next level, with topics such as: policy recommendations for mobile and BYOD, how to measure **return on investment (ROI)**, case study presentations, product features discussions and more
- **Technical Sessions:** These presentations center on ForeScout technology, technical reviews, integrations with third-party systems, hands-on learning labs, customer case studies that demonstrate deployment success, troubleshooting and support and more

The fall sessions will also include an overview of ForeScout's recently released **ControlFabric** platform that enables CounterACT and other IT solutions to exchange information and mitigate a wide variety of network, security and operational issues. Attendees will receive information and demos on the ControlFabric interface.

About ForeScout Technologies, Inc.

ForeScout delivers pervasive network security by allowing organizations to continuously monitor and mitigate security exposures and cyberattacks. The company's CounterACT appliance dynamically identifies and assesses all network users, endpoints and applications to provide complete visibility, intelligence and policy-based mitigation of security issues. ForeScout's open ControlFabric platform allows a broad range of IT security products and management systems to share information and automate remediation actions. Because ForeScout's solutions are easy to deploy, unobtrusive, flexible and scalable, they have been chosen by more than 1,500 enterprises and government agencies. Headquartered in Campbell, California, ForeScout offers its solutions through its network of authorized partners worldwide. Learn more at: www.forescout.com.
