## About the NBT Scanner Plugin

The NBT Scanner plugin obtains the user that is logged in to a given host and the MAC address of that host and also discovers the NetBIOS name of the host, based on port 137 traffic on the network. It is installed and started by default. Various policy and Assets Portal features will not work properly if the plugin is stopped.

## Requirements

CounterACT version 7.0.0 or higher.

## Configuration

No configuration is required.
