

Staff Augmentation Package (Professional Services Consulting)

Highlights

Key Benefits

- Enhance your existing ForeScout platform deployment with ForeScout expertise
- Accelerate time to value
- Maximize return on your ForeScout investment
- Improve resource effectiveness

Key Features

- Services based on best practices
- ForeScout deployment experts deliver real-world experience
- Flexible packages align with specific customer needs

ForeScout's **Staff Augmentation Package** includes Professional Services engineering resources to assist with the evolution and expansion of your ForeScout implementation. ForeScout Engineers identify the current state of your network and advise on/implement best practices to enable you to make informed decisions when enhancing Visibility and Control policies and/or planning for an enterprise rollout of enforcement/remediation actions.

After identifying the baseline of the current state of your deployment, ForeScout Professional Services will update ForeScout platform Discovery, Classification and Assessment policies and will help you get the information and reports you need to plan for and meet your specific goals.

The Package

ForeScout's highly experienced Professional Services Engineers will deliver up to 10 days of onsite or remote consulting services to assist with the following types of activities:

Design and Planning

- Discuss the current state of your ForeScout environment and next steps to help achieve your long-term goals and compliance strategy
- Review network design and recommend:
 - Appliance placement
 - Mirrored traffic
 - Network and systems integrations

Platform Configuration

- Enhance appliance performance
 - Update with the latest software
 - Turn on additional capabilities (threat protection, syslog messages, reports)
- Maximize network integrations
- Expand and optimize endpoint management

Platform Policies

- Optimize current policies
- Expand policies to cover more of your environment
- Update policies to add new use cases
 - New compliance standards
 - Guest management
 - Control actions
 - Orchestration requirements

Package Outcomes

- Services are provided on a time and materials basis

About ForeScout

ForeScout Technologies is transforming security through visibility, providing agentless visibility and control of traditional, IoT and OT devices the instant they connect to the network. Our technology works with disparate security tools to help accelerate incident response, break down silos, automate workflows and optimize existing investments. See devices. Control them. Orchestrate multi-vendor response.
