

Forescout Health Check Package

Forescout's **Health Check Package** is designed to help you ensure that your Forescout implementation is configured for optimal performance based on your network architecture and policy goals. Our Professional Services Engineer will perform an end-to-end configuration review to align the Forescout platform and your security policies with Forescout's best practices.

Following the review, we will a test remediation processes as well as restrictive and notification actions to identify potential gaps in coverage.

The Package

Forescout's experienced Professional Services Engineers will review and test the following components of your implementation:

Hardware Verification

- Identify end-of-life/out-of-support appliances
- Monitor Central Processing Unit (CPU) and memory utilization
- Review Intelligent Platform Management Interface (IPMI) system status via the integrated lights-out interface
- Review appliance and service uptime history
- Test disk health

Platform Configuration

- Completeness and organization of network segments
- Configuration of internal network
- Discovery and inventory properties and timing
- Audit of Switch Port Analyzer (SPAN) port placement and configurations
- Channel configuration
- Identification of oversubscribed appliances
- Threat protection settings and legitimized traffic
- Reporting and logging configurations

Base Module Configuration

- Install available updates to currently installed modules
- Test and configure additional network devices as needed:
 - Network switches
 - Wireless controllers/access points
 - Virtual Private Network (VPN) concentrators

Highlights

Key Benefits

- <) Solidify the current state of your Forescout platform deployment
- <) Fine-tune your policies based on your changing environment
- <) Accelerate the next phase of your Forescout platform rollout
- <) Maximize return on your Forescout investment
- <) Improve resource effectiveness

Key Features

- <) Services based on best practices
- <) Leverages the experience of Forescout deployment experts
- <) Flexible packages aligned with specific customer needs

Policy Configuration

- Review scoping
- Review re-check timing
- Review exceptions
- Review groups
- Review speed of condition/policy resolution
- Identify redundant conditions
- Build in identification of irresolvable devices
- Implement recommended policy templates:
 - Discover
 - Assess
 - Classify
 - Control
 - Information

Classification and Assessment

- Review unmanageable and unclassified devices and identify remediation steps
- Review compliance policies for identification of exceptions and irresolvable devices
- Assist with identification of policy goals and desired enforcement actions
- Advise on steps required to reach compliance goals and enforcement
- Configure additional compliance policies as needed

Policy Testing (enforcement, remediation and notification)

- Testing of enforcement policies for appropriate timing and effectiveness of restrictions
- Remediation testing of built-in remediation scripts or customer-provided remediation scripts
- Validate
- Identify gaps in coverage

Deliverables

- Engagement summary document
- Optimized configuration and policies
