About Network Devices Compatibility

ForeScout CounterACT® supports a wide range of networking device vendors and their products. The following tables describe support for Wired, Wireless LAN and VPN devices, with detailed information about the models and operating systems versions that were validated for integration with CounterACT's Switch, Wireless and VPN Plugins.

Products in these tables below represent a subset of each vendor's product portfolio, as it is impossible to test every available model and operating system. CounterACT may support additional models from these vendors as well, although not explicitly specified below.

For more information about supported functionalities, configuration and requirements refer to individual Plugin Configuration Guides.

ForeScout reserves the right to change this document at any time, without notice, at ForeScout's sole discretion.

Wired Integrations (Switches)

CounterACT supports the following switches:

Cisco Switches

Category	Switch Series	OS Version	Minimum CounterACT Plugin Version	See			Control		
				Endpoint Detection	VoIP Detection	Switch Discovery	Assign to VLAN	Block Switch Port	Provision ACL
Campus LAN Switches – Access	Meraki MS	MS-10.35	CNC-1.0.0.1	✓	✓	✓
