About Endpoint Support Compatibility

ForeScout CounterACT® supports a wide range of endpoint vendors and their products. The following tables describe support for these vendors, with additional information about versions and flavors that were validated for integration with various CounterACT components.

Information is also available regarding Web Browser support, which is relevant when endpoint users interact with the CounterACT web server.

For additional information about supported functionalities, configurations and requirements please refer to each of the relative CounterACT Configuration Guides.

Operating Systems

In CounterACT, each operating system may be supported in one of two ways:

Detailed classification (version, edition, service pack, etc.)

Management (inspection and control using either SecureConnector™ or Remote Inspection)

Microsoft Windows (32 & 64 BIT Versions)

Management of Windows® endpoints is provided by the HPS Inspection Engine. Classification of Windows endpoints is supported by the Windows Applications Plugin. In order to manage and classify the Windows versions below, verify that you are working with both the corresponding Windows Applications and HPS Inspection Engine Plugins listed in the table.

Windows Version	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows 2000 Professional/Server/Advanced Server/Datacenter Server, with Service Pack 4 and above installed.	1.1.0	10.1.0
Windows XP Home/Professional/Tablet PC and embedded packages	1.1.0	10.1.0
Windows Vista Home/Business/Enterprise/Ultimate	1.1.0	10.1.0
Windows 7 Starter/Home/Professional/Enterprise/Ultimate	1.1.0	10.1.0

Windows Version	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows 8 Standard/Professional/Enterprise	1.1.0	10.1.0
Windows 8.1 Standard/Professional/Enterprise	1.1.0	10.2.3
Windows 10 Insiders Edition version 1803 build 17134.1 ⁽¹⁾	2.1.4.2007	10.7.2.1006
Windows Server 2003 Standard/Enterprise/Datacenter/Web	1.1.0	10.1.0
Windows Server 2008 Standard/Enterprise/Datacenter/Web Server and core packages	1.1.0	10.1.0
Windows Server 2012 Standard/Essentials/Foundation/Datacenter	1.1.0	10.1.0
Windows 10 Home/Professional/Enterprise/Education/Enterprise LTSC	2.1.0	10.2.4
Windows Server 2016	2.1.3.1	10.7.0 (Remote Inspection only)

(1) Windows 10 1803 Spring Creators Edition reports "NT_STATUS_INVALID_PARAMETER_MIX" when using RI (RRP) with Task Scheduler.

A work around is to use fsprosvc as the script execution method when running scripts via Remote Inspection.

MAC OS X / MACOS

Management of OS X / macOS endpoints is provided using one the following inspection methods.

- Remote Inspection
- SecureConnector

Support is provided by the either the OS X Plugin or the Macintosh Linux Host Property Scanner (MacLinux) Plugin.

In order to manage the OS X / Mac OS versions below, verify that you are working with the corresponding Plugins listed in the table.

OS X / macOS Version	Using Remote Inspection	Using SecureConnector
OS X 10.6 (Snow Leopard)	MacLinux Plugin 6.1.5 or above	Not supported
OS X 10.7 (Lion)	MacLinux Plugin 6.1.5 or above	Not supported
OS X 10.8 (Mountain Lion)	MacLinux Plugin 6.1.5 or above OS X Plugin 2.0.0	MacLinux Plugin 6.1.5 or above OS X Plugin 1.1.0 – 2.0.0
OS X 10.9 (Mavericks)	MacLinux Plugin 6.1.6 or above OS X Plugin 2.0.0	MacLinux Plugin 6.1.6 or above OS X Plugin 1.1.0 – 2.0.0
OS X 10.10 (Yosemite)	MacLinux Plugin 6.1.8 or above OS X Plugin 2.0.0	MacLinux Plugin 6.1.8 or above OS X Plugin 1.1.0 – 2.0.0
OS X 10.11 (El Capitan)	MacLinux Plugin 7.0.0 or above OS X Plugin 2.0.0	OS X Plugin 1.1.0 – 2.0.0
Mac OS 10.12 (Sierra)	MacLinux Plugin 7.0.1.2 OS X Plugin 2.0.0	OS X Plugin 1.2.0 - 2.0.0
Mac OS 10.13 (High Sierra)	OS X Plugin 2.0.0	OS X Plugin 2.0.0
Mac OS 10.13.4 (High Sierra)	OS X Plugin 2.1.0	OS X Plugin 2.1.0
Mac OS 10.14 (Mojave)	OS X Plugin 2.1.0.1008 or above	OS X Plugin 2.1.0.1008 or above

Linux

Management of Linux endpoints is provided using either the Remote Inspection or SecureConnector inspection method. Support was traditionally provided by the Macintosh Linux Host Property Scanner (MacLinux). As of July 2017, the Macintosh Linux Host Property Scanner is no longer being developed, and all Linux support is being transitioned to the Linux Plugin.

In order to manage the Linux versions below, verify that you are working with the corresponding Macintosh Linux Host Property Scanner, or Linux Plugin listed in the table.

Linux Flavor	Linux Version	Minimum MacLinux Plugin Version (Remote Inspection or SecureConnector)	Minimum Linux Plugin Version (Remote Inspection or SecureConnector)

Web Browsers

Web browser support is relevant when endpoint users interact with the CounterACT web server. This occurs when:

- Users download SecureConnector following redirection to the captive portal.
- Using HTTP notification actions to present messages or warnings to users in their web browsers.
- Corporate or guest users sign in via a captive portal web page.
- Managing guest accounts using the Sponsor Portal.
- Using the Compliance Center to help users self-remediate.

The following web browsers are supported by CounterACT:

- Internet Explorer 10.x, 11.x and Microsoft Edge
- Apple Safari 9.0 and above on Mac OS; Safari 8.3 and above on iOS
- Google Chrome 46 and above
- Mozilla Firefox 43.0 and above
- Android browser 1.5 and above

The browser list above is non-exhaustive. Most CounterACT web portals work on HTML4 compatible web browsers and are not necessarily limited to the browsers listed above. This includes old browsers that may no longer be supported by the vendors.

Note that this document/section does not deal with administrator portals such as the Assets Portal and Reports Portal. However, these portals will also work using the same web browsers listed above.

Microsoft Windows Applications

Detection of applications from the following vendors and remediation of Windows endpoints with those applications installed require CounterACT's Windows Applications. When a company name is listed rather than a specific product name in the following sections, CounterACT supports that company's related products (for example, in the Antivirus section below, ForeScout supports Microsoft's antivirus products). For detailed information about updates to Endpoint plugins, refer to the *Endpoint Module Release Notes*.

The list below is valid as of Windows Applications 2.1.2.
