About Network Devices Compatibility

The Forescout platform supports a wide range of networking device vendors and their products. The following tables describe support for Wired, Wireless LAN and VPN devices, with detailed information about the models and operating systems versions that were validated for integration with Forescout's Switch, Wireless and VPN Plugins.

Products in these tables below represent a subset of each vendor's product portfolio, as it is impossible to test every available model and operating system. The Forescout platform may support additional models from these vendors as well, although not explicitly specified below.

For more information about supported functionalities, configuration and requirements refer to individual Plugin Configuration Guides. Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

Wired Integrations (Switches)

The Forescout platform supports the following switches:

Cisco Switches

 VRF configuration is supported for switches that implement VRF.

 Device is in End-of-Sale/End-of-Life status with Vendor. No new updates will be provided and Forescout support will be provided as best effort to resolve issue.

HPE Switches

📖 VRF configuration is supported for switches that implement VRF (switches running Comware OS only).

* Device is in End-of-Sale/End-of-Life status with Vendor. No new updates will be provided and Forescout support will be provided as best effort to resolve issue.

About Endpoint Support Compatibility

The Forescout platform supports a wide range of endpoint vendors and their products. The following tables describe support for these vendors, with additional information about versions and flavors that were validated for integration with various Forescout components.

Information is also available regarding Web Browser support, which is relevant when endpoint users interact with the Forescout web server.

For additional information about supported functionalities, configurations and requirements please refer to each of the relative Forescout Configuration Guides.

Forescout Technologies, Inc. reserves the right to change this document at any time, without notice, and at Forescout's sole discretion.

Operating Systems

In the Forescout platform, each operating system may be supported in one of two ways:

Detailed classification (version, edition, service pack, and so on.)

Management (inspection and control using either SecureConnector™ or Remote Inspection)

Microsoft Windows (32 & 64 BIT Versions)

Management of Windows® endpoints is provided by the HPS Inspection Engine. Classification of Windows endpoints is supported by the Windows Applications Plugin. In order to manage and classify the Windows versions below, verify that you are working with both the corresponding Windows Applications and HPS Inspection Engine Plugins listed in the table.

Windows Version	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows 2000 Professional/Server/Advanced Server/Datacenter Server, with Service Pack 4 and above installed.	1.1.0	10.1.0
Windows XP Home/Professional/Tablet PC and embedded packages	1.1.0	10.1.0
Windows Vista Home/Business/Enterprise/Ultimate	1.1.0	10.1.0
Windows 7 Starter/Home/Standard/Professional/Enterprise/Ultimate Build 6.1.7601	19.0.1	10.8.1.2023
Windows 8 Standard/Professional/Enterprise	1.1.0	10.1.0
Windows 8.1 Standard/Professional/Enterprise version 6.3.9600	19.0.1	10.8.1.2023
Windows 10 Insiders Edition version 1809 build 18252.x	V8: 18.0.11 V7: HPS Applications 2.1.9.1	10.7.2.2
Windows 10 Insiders Edition version 1803 build 17134.x ⁽¹⁾	2.1.4.2007	10.7.2.1006
Windows 10 Enterprise Edition version 1809 build 17763.x	19.0.1	10.8.1.2023
Windows Server 2003 Standard/Enterprise/Datacenter/Web	1.1.0	10.1.0
Windows Server 2008 Standard/Enterprise/Datacenter/Web Server and core packages	19.0.1	10.8.1.2023
Windows Server 2012 Standard/Essentials/Foundation/Datacenter	19.0.1	10.8.1.2023
Windows 10 Home/Professional/Enterprise/Education/Enterprise LTSC	2.1.0	10.2.4

Windows Version	Detailed Classification (Minimum Windows Applications version)	Management (Minimum HPS Inspection Engine version)
Windows Server 2016	2.1.3.1	10.7.0 (Remote Inspection only)

(1) [Windows 10 1803 Spring Creators Edition reports "NT_STATUS_INVALID_PARAMETER_MIX" when using RI \(RRP\) with Task Scheduler.](#)

[A work around is to use fsprosvc as the script execution method when running scripts via Remote Inspection.](#)

MAC OS X / MACOS

Management of OS X / macOS endpoints is provided using one the following inspection methods.

- Remote Inspection
- SecureConnector

Support is provided by the either the OS X Plugin or the Macintosh Linux Host Property Scanner (MacLinux) Plugin.

In order to manage the OS X / Mac OS versions below, verify that you are working with the corresponding Plugins listed in the table.

OS X / macOS Version	Using Remote Inspection (Minimum Version)	Using SecureConnector (Minimum Version)
OS X 10.6.x (Snow Leopard)	MacLinux Plugin 6.1.5 or later	Not supported
OS X 10.7.x (Lion)	MacLinux Plugin 6.1.5 or later	Not supported
OS X 10.8.x (Mountain Lion)	MacLinux Plugin 6.1.5 or later OS X Plugin 2.0.0	MacLinux Plugin 6.1.5 or later OS X Plugin 1.1.0 – 2.0.0
OS X 10.9.x (Mavericks)	MacLinux Plugin 6.1.6 or later OS X Plugin 2.0.0	MacLinux Plugin 6.1.6 or later OS X Plugin 1.1.0 – 2.0.0
OS X 10.10.x (Yosemite)	MacLinux Plugin 6.1.8 or later OS X Plugin 2.0.0	MacLinux Plugin 6.1.8 or later OS X Plugin 1.1.0 – 2.0.0
OS X 10.11.x (El Capitan)	MacLinux Plugin 7.0.0 or later OS X Plugin 2.0.0	OS X Plugin 1.1.0 – 2.0.0
Mac OS 10.12.x (Sierra)	MacLinux Plugin 7.0.1.2 OS X Plugin 2.1.1.1007	OS X Plugin 2.1.1.1007

OS X / macOS Version	Using Remote Inspection (Minimum Version)	Using SecureConnector (Minimum Version)
Mac OS 10.13.x (High Sierra)	OS X Plugin 2.1.1.1007	OS X Plugin 2.1.1.1007
Mac OS 10.14.x (Mojave)	OS X Plugin 2.1.1.1007	OS X Plugin 2.1.1.1007

Linux

Management of Linux endpoints is provided using either the Remote Inspection or SecureConnector inspection method. Support was traditionally provided by the Macintosh Linux Host Property Scanner (MacLinux). As of July 2017, the Macintosh Linux Host Property Scanner is no longer being developed, and all Linux support is being transitioned to the Linux Plugin.

In order to manage the Linux versions below, verify that you are working with the corresponding Macintosh Linux Host Property Scanner, or Linux Plugin listed in the table.

Linux Flavor	Linux Version	Minimum MacLinux Plugin Version (Remote Inspection or SecureConnector)	Minimum Linux Plugin Version (Remote Inspection or SecureConnector)	
CentOS	5	6.1.5	Not supported	
	6 7	6.1.5	1.1.0	
Debian	8	7.0.0	1.1.0	
Fedora	18 19 20	6.1.5	1.1.0	
	21 22 23	7.0.0	1.1.0	
	Kali	4.6.x (32 bit)	Not supported	1.1.0
	Mint	4.4.x (64 bit)	Not supported	1.1.0

Linux Flavor	Linux Version	Minimum MacLinux Plugin Version (Remote Inspection or SecureConnector)	Minimum Linux Plugin Version (Remote Inspection or SecureConnector)
Red Hat Enterprise Linux	5 6	6.1.9	Not supported
	7	7.0.0	1.1.0
	7	6.1.5	1.1.0
Red Hat Enterprise Linux Desktop	7	6.1.5	1.1.0
OpenSUSE	12 13 42	6.1.9	1.1.0
	11 12	6.1.9	1.1.0
	12.x 13.x 14.x 15.x 16.x	6.1.9	1.1.0
18.x	N/A	1.2.1.1011 (v8) 1.1.1.1003 (v7)	
SUSE Enterprise	11 12	6.1.9	1.1.0
Ubuntu	12.x 13.x 14.x 15.x 16.x	6.1.9	1.1.0
	18.x	N/A	1.2.1.1011 (v8) 1.1.1.1003 (v7)

Web Browsers

Web browser support is relevant when endpoint users interact with the Forescout web server. This occurs when:

- Users download SecureConnector following redirection to the captive portal.
- Using HTTP notification actions to present messages or warnings to users in their web browsers.
- Corporate or guest users sign in via a captive portal web page.
- Managing guest accounts using the Sponsor Portal.
- Using the Compliance Center to help users self-remediate.

The following web browsers are supported by the Forescout platform:

- Internet Explorer 10.x, 11.x and Microsoft Edge
- Apple Safari 9.0 and above on Mac OS; Safari 8.3 and above on iOS

- Google Chrome 46 and above
- Mozilla Firefox 43.0 and above
- Android browser 1.5 and above

The browser list above is non-exhaustive. Most Forescout web portals work on HTML4 compatible web browsers and are not necessarily limited to the browsers listed above. This includes old browsers that may no longer be supported by the vendors.

Note that this document/section does not deal with administrator portals such as the Assets Portal and Reports Portal. However, these portals will also work using the same web browsers listed above.

Microsoft Windows Applications

Detection of applications from the following vendors and remediation of Windows endpoints with those applications installed require Forescout's Windows Applications. When a company name is listed rather than a specific product name in the following sections, the Forescout platform supports that company's related products (for example, in the Antivirus section below, Forescout supports Microsoft's antivirus products). For detailed information about updates to Endpoint plugins, refer to the *Endpoint Module Release Notes*.

The list below is valid as of Windows Applications 2.1.2.

About eyeExtend Products Compatibility

The Forescout platform supports a wide range of vendors and their products. The supported versions documented in the help files describe support for eyeExtend solutions with detailed information about the models and operating systems versions that were validated for integration with Forescout's products.

Products listed in each help file represent a sub set of each vendor's product portfolio, as it is impossible to test every available model and operating system. The Forescout platform may support additional models from these vendors as well, although not explicitly specified.

For additional information about supported functionalities, configuration and requirements please refer to individual Forescout Configuration Guides.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

eyeExtend Products Integrations

Vendor	Vendor Product	Vendor Version Supported	Vendor API Version	Minimum eyeExtend Product Version	
				CounterACT v7.0	CounterACT v8.x

About Data Center/Cloud Compatibility

The Forescout platform supports a wide range of data center/cloud vendors and their products. The following tables describe support for the software versions that were validated for integration with Forescout's Plugins.

Products in these tables below represent a subset of each vendor's product portfolio, as it is impossible to test every available model and operating system. The Forescout platform may support additional models from these vendors as well, although not explicitly specified below.

For more information about supported functionalities, configuration and requirements refer to individual Plugin Configuration Guides.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

DC/Cloud

The Forescout platform supports the following software packages:

Vendor	Product		Forescout Plugin
	Name	Versions	Minimum version
VMWare	VMware vSphere	6.7 Ux 6.5 Ux 6.0 Ux	2.2.0.1010
VMWare	VMware NSX	6.4	2.0.0
AWS	Amazon Web Services	?	2.0.3

About Hypervisor Compatibility

The Forescout platform supports a wide range of virtualization vendors and their products. The following tables describe support for the software versions that were validated for integration with the Forescout platform and its related subcomponents.

Forescout reserves the right to change this document at any time, without notice, at Forescout's sole discretion.

Hypervisors

The Forescout platform supports the following software packages:

Vendor	Product	
	Name	Versions
VMWare	ESXi	6.7 Update 1 6.5 Update x 6.0 Update x
Microsoft	Hyper-V	X.X
RedHat	KVM	X.X
