	End of full support (transition to limited support)	End of limited support and last support date
Forescout 8.1	July 31, 2022	January 31, 2023
Forescout 8.2	March 31, 2022	March 31, 2023

For definition of Full support and Limited support, please refer to the [Forescout End-of-Life Policy](#). End of life information for other software versions is available [here](#).

Customers can upgrade to Forescout 8.3 and take advantage of several new capabilities to secure their Enterprise of Things (EoT):

- **Profiles for Configuring Plugin Management of Network Devices:** Create configuration profiles per switch vendor for managing that vendor's network devices.
- **Improved Upgrade Time for High Availability Pairs:** After upgrading to this version, subsequent upgrades to a Forescout platform High Availability (HA) deployment (Enterprise Manager and HA Appliance pairs) provide improved upgrade time and a more resilient upgrade experience.
- **Security Enhancements:** Additional enhancements that ensure more robust platform security. We've updated the Java runtime environment, PostgreSQL version and applied kernel changes.

Customers that require Common Criteria Certification currently on Forescout 8.1 can upgrade to Forescout 8.2.

Our Professional Services team is ready to help if you need assistance upgrading to a supported version of the Forescout platform. Please contact your account team or your preferred channel partner to discuss options that suit your needs.
